If you stay at home or if you go camping you will need

EXECUTORS' NOTICE TO CREDITORS.

In the estate of George Jerry Clapper, deceased

Notice is hereby given pursuant to Chapter 174, of the Revised Statutes of Ontario, Section 33, and amending Acts, that all persons having any claims or demands against the estate of George Jerry Clapper, late of the Township of George Jerry Clapper, in the County of Lennox and Addington, deceased, who died on or about the 18th day of June, A. D. 1910, are required to deliver or send by post prepaid to Herrington, Warner & Grange, Napanee, Ontario, solicitors for David Robin Ricks and Sanford Auburn of the said George Jerry Clapper, deceased, on or before the 1st DAY OF AUGUST, A. D. 1910, their christian and surnames, addresses and descriptions, with full particulars of their claims or demands duly verified, and the nature of the security, if any, held by them.

TOWN COUNCIL.

Council Chamber,
July 4th, 1910.

Council met in regular session on Monday, July 4th, Mayor T. W. Simpson presiding.

Present—Councillors, Steacy Osborne, Hawley, Kimmerly.

The minutes of the last regular session were read and confirmed.

The following communication was read from the Board of Railway Commissioners of Canada in reference to the railway situation at the Napanee station: Referring to your letter of the 7th inst., I am directed to say that the Board's chief operating officer has inspected the location and advises that the street crossing will be improved by taking up two tracks now crossing Centre street; Bay of Quinte trains will continue to cross Centre street, south of the Grand Trunk tracks and make transfer of passengers to and from the Grand Trunk as at present. Fyld.

The following communication was read from A. H. Millar, town clerk of Berlin: I am instructed to forward you a copy of the following resolution, which was passed by our Municipal Council, and ask you to lay it before your council and have them to endorse it by resolution and to send a copy of such endorsement to the Attorney-General of Ontario.

The resolution is as follows: That whereas a fixed assessment, or a partial or total exemption from taxation, is declared by law to be a Bonus.

And whereas a bonus may not be given except by vote of the ratepayers. And whereas a large number of municipalities in the Province are systematically violating the law by giving to manufactures and others, fixed in reduced assessment, without such vote of the ratepayers.

And whereas such violations of the law result in placing at a disadvantage those municipalities which do observe the law, so that it becomes difficult for such municipalities to obtain new industries under such unequal and unjust conditions.

Therefore it is resolved that the Ontario legislature be and is hereby petitioned to provide for such governmental inspection of assessment as will insure the due observance of the assessment law in this respect; and that a copy of this resolution be forwarded to the Attorney-General, and further, that other municipal councils of the Province be requested to endorse this resolution and to send a copy of such endorsement to the Attorney-General.

A resolution was passed authorizing the proper officials to draft a resolution endorsing the above and have same sent to Attorney-General.

The treasurer's monthly report, which was as follows, was read and adopted:

Balance	\$1800 61	420 73	102 75	31 20	380 05
Expended	\$1100 30	4088 38	179 27	227 25	18 80
ation	00	37	00	00	00

ENTRANCE EXAMS.

Buy Good Paint Oil and pay the price.

When Paint Oil is selling for more than a dollar a gallon, you will always find a dollar grade at same price, if the good oil happened to be 50c, at the same time you would find 40c grade but after all there's nothing like buying the best, it's the cheapest always. Get it at Wallace's.

SHARPTON.

Statute labor is the order of the day. A. Vrooman secured the job of breaking stone on the road.

J. Taylor has returned after a week's absence, visiting in Kingston.

Visitors: Miss Hazel Morrison, Odessa, at J. Graham's; George McGowan, Kingston, made a flying visit here.

NEWS NOTES.

Nineteen persons were killed in a
train wreck near Dayton, Ohio.

F. A. Mackenzie, a deaf and dumb
student, has taken a degree from Cam-
bridge.

Five inches of hail fell in Lewisville,
Alberta, and much damage was done
to the crops.

Mr. Herbert Barber fell from a rig at
Guelph, striking on his head, and it is
feared he is fatally injured.

Mr. Frederick Villiers has decided to
come to Canada and live, and will
probably settle in Victoria, B. C.

Mr. Timothy Shine walked out of a
hotel window and fell over a balcony
in his sleep at Lindsay and was fatally
injured.

The Grand Trunk freight sheds,
weighhouse and a number of freight
cars at Allandale were burned, with
most of their contents.

The body of Frank Gouldthrite, who
was wanted in Ottawa in connection
with the frauds in the Printing Bur-
eau, was found in the Detroit River
Sunday.

Woodstock, July 5.—The promised
departmental investigation into the
charges preferred in an article pub-
lished in a recent issue of The Sentinel-
Review against an officer of the Cana-
dian Immigration Department, for us-
ing insulting language and ordering
Mr. W. J. Taylor, the well-known
newspaper and magazine publisher of
this city, off the train at Windsor, was
held yesterday afternoon at The Sen-
tinel-Review office, and was conducted
by Mr. H. G. Herbert, travelling in-
spector of the immigration department.
The officer against whom the charges
were laid was present. The inspecting
officer had in his possession a written
statement from an eyewitness of the
affair, which tallied with the account
as outlined by Mr. Taylor.

Before the investigation closed the
offending official acknowledged that
he had made a mistake in addressing
Mr. Taylor in the way he did, and
stated that he was under the impres-
sion that he was addressing another
man with whom he had an altercation
a few minutes before. The offending
officer consequently tendered both a
verbal and written apology to Mr.
Taylor for his conduct on the night in
question and for the remarks made.

The report of the investigation is
being forwarded by the inspecting
officer to the department at Ottawa.
What action the department will take
remains to be seen.

MARYSVILLE.

The weather is very dry and rain is
badly needed.

Lax-ets 5 C Sweet to Eat
A Candy Sweet Laxative.

ODESSA.

Dry weather is the topic of the day. Mrs. Stover who was seriously kicked by a cow, is improving nicely now. Mrs. H. Snider is able to sit up at present.

Mrs. Hamm is still very low. Mrs. Fred Benjamin is able to be out driving.

Mr. Metzler and wife, of Syracuse, are spending a few weeks with his brother, Robert Metzler. On Sunday evening he occupied the pulpit in the M. E. Church.

The Odessa brass band attended a picnic at Tamworth on Dominion Day. This was the third engagement for the week. The village ought to be proud of the fine music under the instruction of Mr. Heaslip.

Mrs. Albert Booth is spending two weeks in Toronto.

A Booth spent a day in Belleville this week.

The Wilton stage is doing a good business to Kingston in both trade and passengers.

J. H. Babcock has the frame of his gasoline boat nearly completed.

A. Booth's woollen mills are running again. The new machinery is working well.

The Misses McFarlane have returned from Cobalt.

Mr. Sharp, Toronto, at his sister's, Mrs. A. Parrott; Mrs. E. Sharp, Toronto, at her father's, A. Snider; Miss E. McDermott, Mrs. Z. Hunter and daughter, Watertown, with friends in the village; Miss Ida Buck, Moscow, at J. H. Babcock's; Miss Genieve Aylesworth, Toronto, at A. Aylesworth's.

Children Cry FOR FLETCHER'S CASTORIA

Miss M. Cassidy with Miss N. Davis, Richmond; Miss L. Drummey with Miss K. Fields; Mrs. M. Ford with Mrs. J. C. Meagher; Miss Jenny O'Neal with her parents at Bedford Mills; Mrs. J. Kenny, Rochester, N. Y., with her parents, Mr. and Mrs. A. Campbell; Mr. and Mrs. W. Smith and family, Toronto, with her parents, Mr. and Mrs. J. Toppings; Mr. and Mrs. J. W. Russell with her parents, Mr. and Mrs. M. Sexsmith, Kingsford. Miss A. Fahey returned home on Saturday, after visiting friends and relations at Brewers Mills and Kingston.

For Motor Boats and Automobiles.

High grade gas engine oil (low percentage of carbon). Brass polish. Wind glasses. Motor gasoline at The Medical Hall. Napanee's Largest Drug Store - Fred L. Hooper.

CHEESE BOARD.

The regular meeting of the Cheese Board, was held in the Council Chamber, Friday last. Twenty-three factories boarded, 2310 cheese, 1880 white, 430 colored. Bidding opened at 101-2 and closed at 107-8 at which price 1315 cheese were sold. Balance sold on curb at same price. The following factories boarded:

NOVEL SCENIC FEATURE AT TORONTO.

They're anticipating history at the Canadian National Exhibition this year where they will produce as one of the big features of the fireworks spectacle a battle between an airship and a dreadnought. The monsters of the sea and air advancing from different sides of the arena will meet in a terrific fight in which the dreadnought is sunk and the airship finally blows up. It's something entirely new in fireworks and as spectacular as it is novel.

MARBLE AND GRANITE MONUMENTS.

IN CHOOSING A GRANITE MONUMENT

you run a big risk in ordering from a picture, from the travelling salesmen.

I Have Large Stock on Hand to Pick From

You won't have to wait three or four months—then hurriedly done up.

V. K. OUBER, Napanee.

Enquire on premises. Also Piano for sale. MRS. G. VANALSTINE. 137.

40 FARMS FOR SALE in Napanee and Belleville districts. Many of these are valuable farms, and at right price. Call at once or write for list. We can suit you, and you will save time and money. Also some good town properties. W. G. H. BROWN, Real Estate. Opposite Royal Hotel, Napanee.

FARM FOR SALE—100 acres—Valuable and desirable farm in Ernestown Township, lot No. 13, 7th concession, six miles from the town of Napanee, and about three miles from Newburgh. Farm is well fenced, never failing creek through centre of farm. Good frame house and new barn. 74 acres under cultivation, 26 acres woodland. Apply to W. G. BAUGHAN, at Gibbard's sale rooms, Napanee. 28-1f

NOTICE.

Notice is hereby given that the Municipal Council of the Township of Richmond intends at its regular meeting to be held on the first Monday in September, 1910, to pass a by-law for the closing of that part of a road which runs across the north end of the south half of lot No. 13, and the west half of lot No. 14, in the seventh concession of the Township of Richmond, and that all parties interested are required to take notice and govern themselves accordingly.

ABRAM WINTERS,
Tp. Clerk of Richmond,
Selby, June 14th, 1910. 27-4-d

Albert Proctor, aged seventeen, was shot and killed while playing with firearms with a companion near Clinton.

A young aviator named Wachler, was killed when his aeroplane fell from a height of 500 feet at Heims, in France.

Albert Rogers of Guelph is said to have been left \$40,000 by a wealthy Pittsburgh man, whom he saved from drowning in Scotland some years ago.

STONE & WELLINGTON,

The Fonthill Nurseries,

Toronto, Ont.

Established 1837.

When the British Ornithologists' Union set out for Dutch Guinea it was after birds, presumably, but it lit on something better. Better, that is to say, from the social point of view—assuming the validity of the Roman's remark that nothing human was foreign to him. For the union, dropping ornithology and taking up anthropology, discovered a race of pygmies. The existence of a pygmy race became an ascertained fact some years ago, yet corroborative evidence is welcome. The pygmy exists in central Africa and in Luzon. But a small matter can make an impression only by reiteration, and this New Guinea tribe cannot but give a decided backing up to its obscure and scattered cousins elsewhere.

The average height of the newcomers is 4 feet 3 inches. They are in no sense dwarfs, but are well developed and well proportioned. They are nomadic, and depend for their living entirely on their skill in hunting and fishing. They are not cannibals and are generally monogamous. "They are unable to express a higher numerical idea than three," and their brains are thatched with hair in peppercorn tufts. "They are a merry little people," and tip their arrows with a species of strychnine. "They have great ideas of hospitality," and use spring guns with hardened bamboo spears that inflict serious and painful wounds.

They appear to dwell on the lower slopes of the great snow mountains. May they continue to dwell there in peace. Their color, that of a "newly blacked stove," is against them. So is their size. The two would lead, in case of closer intimacy with the white man, whether at home or abroad; to social and political tyrannies that one would prefer not to contemplate.

The large majority of men and women in this workaday world are engaged not upon tasks of their selection but in doing the labor that lies next to them. The stress of life has been too great and the press of need too immediate to permit them to consult their tastes and talents, and to select the appropriate and agreeable occupation. They are not even given the privilege of building up a work monument for themselves, and, though they may live to be old and may never have faltered in their industry, still at the end of life they are not able to say: "This structure is mine. I built it with my muscles and my brains. It is the evidence of my faithfulness, the certificate of my power." Their individual labor is swallowed up in some aggressive and successful

AIMLESS, PURPOSELESS LIFE

A Good Man Without an Aim Works as Much Harm as a Bad Man With One

"Faith is the substance of things hoped for, the evidence of things not seen."—Heb. xi. 1.

Faith does not fight facts; it forms them rather than follows them. Things are because men believe that they ought to be. Faith sees the fact as an ideal before it becomes a reality. The world is born in the heart of man before it is projected into time.

Men either live according to an inner ideal of conduct and character or they drift and are fashioned according to the whim of chance or circumstances. We either follow an inner light and fight through whatever opposes or we yield to every passing impression.

Perhaps half the men and women of our day do not live from within; they are pushed around, tossed here and there, poor blind creatures of accident. They depend on the will of the wind to choose their ways, for they have no itinerary and no goal of their own.

It is easy to imagine that you are demonstrating your piety by placid submission to circumstances, that faith in providence means to wait for some breeze to blow you into the heavenly harbor. If the winds turn out to be unfavorable then you can only say it is the will of the Lord.

But the power of willing, directing, and creating is the work of the divine. Men are called to a part in

THE CREATOR'S WORK.

Each has his own little world to make. The best evidence of faith in the divine is purposeful endeavor to fulfill the divine plan in your life.

The programless, purposeless lives are really the lawless ones, for they assume that life is without order or law, the game is without rules. They get through by expedients instead of becoming experts in the art of living.

Faith is the power to determine the outer life by the vision within, to become obedient ourselves to the heavenly vision and to make that vision the dominant factor in all our life. The men who do great things are all men of faith, men who

are able to see the things that are not yet realized and so to hold them before their eyes that they press steadily to their realization.

What your life will be really, essentially, is determined not by the outer world of circumstances but by the inner world of your hope and confidences, by what you cherish in your heart and highly determine within you as the way and end of life for you. The inner light conquers all outer darkness. Men who have come from the bottom up have not been forced forward; they have followed the light of their faith.

The growth of our own characters, the development of ourselves, depends on whether we have the confidence that life is truly a forward movement, a process of development, whether we have the faith that the world grows better and man is called to go on from stage to stage,

FROM GLORY TO GLORY.

Your idea of the law of movement in the universe finds its reflection in the progress or stagnation and decay of your own life.

When one has the confidence that God is on his side, that the law of this universe is the law of progress, that all its forces fight with the true and good for the best and the better day, then nothing can long oppose him, he fears no foes, no clouds oppress him for long, for no matter what the world without may offer how dark the way or hard the fight, there burns clear within this confidence that all things do work together for good.

This is faith and this is religion for us all: To cherish this ideal in our hearts, to hold fast to this, that our lives are not drifting wrecks, that life is not a lonely struggle against impossible odds, but that for every one of us it may be our glad participation in the divine programme, our co-operation with the infinite, the setting of our being in the tides of eternity so that we may find our striving, bearing, toiling, all to be part of the sublime story of the coming of the new heaven and the new earth.

HENRY F. COPE.

THE SUNDAY SCHOOL

INTERNATIONAL LESSON, JULY 10.

Review. Golden Text, John 6. 63.

QUESTIONS FOR INTERMEDIATE SCHOLARS.

Lesson I.—The Power of Faith.—How were Jesus and his disciples met on their return to Capernaum? Who was Jairus? How did Jesus answer the request of Jairus? On

How did Herod fulfill his promise? What did John's disciples do?

Lesson IX.—The Multitudes Fed.—Where did Jesus and his disciples go for rest? Who followed them, and why? At evening what happened? How were they fed? Where did Jesus again seek to go to rest with his disciples? How long did the multitudes remain with Jesus? How did he care for them?

Lesson X.—Jesus Walks on the Sea.—What did Jesus do after the feeding of the five thousand? What did Jesus wish to do? What occurred when the disciples were on their way? How did Jesus go to help them? How did this affect the disciples? Tell about Peter and the trial of his faith. When Jesus and Peter were in the boat, what han-

HOME.

SELECTED RECIPES.

Delicious Temperance Punch.—Use one cup of strong tea, one cup of sugar, one pint of Apollinaris, one pint of ginger ale, three-fourths cup of orange-juice, one-third cup of lemon-juice. Mix and chill. This is also good frozen and served as a sherbet.

Potato Dish.—Boil and mash lightly five good-sized white—or sweet—potatoes; boil three eggs about twelve minutes. Remove the shells and chop the eggs, whites and yolks together, not very fine. Turn the mashed potato into a hot, buttered frying-pan; as soon as the potato is thoroughly browned, add the chopped egg, mixing it in a fork; cook for two or three minutes, and serve immediately. This is an old Southern breakfast dish.

Frumenty, an Old English Dish.—Scald one-half gallon of new wheat, rub off the husks or bran, and boil it in water until it is perfectly tender, and nearly all the moisture has evaporated. Add one-half gallon of raw milk; boil the wheat again, and while boiling add one-half dozen eggs, well beaten, one pound of white sugar and a few sticks of cinnamon. When the mixture has received a thorough cooking remove the cinnamon from it and serve. This is a dish very much enjoyed in the harvesting season.

Sponge Tarts.—Cut a loaf of baker's or coarse-grained, home-made sponge-cake in half, tipping it on edge, and cutting the long way of the loaf, leaving a top and a bottom half. Cut in rounds, and then cut each round again with a smaller cutter, not quite to the bottom, so that an under crust and rim of the first round will be left. In this fit a half-peach, filled up even with powdered macaroons. Pour over it a syrup of peach-juice and orange-juice, half and half. Set away to cool, and just before serving, put a spoonful of whipped cream on each tart.

Chocolate Frosted Crackers.—Vary the conventional cookie by frosting ordinary soda-crackers or tea-biscuits with a plain chocolate frosting. Melt two squares of chocolate; rub into it one cup of sugar; add slowly, while stirring, half from the fire and stir into it, until it is so thick that it will fall in heavy, jelly-like splashes from the spoon. Remove it from the fire and beat it vigorously for a minute. Spread it generously and allow it to dry. There should be enough frosting for four dozen square soda-crackers. The addition of nuts also lends variety.

Green Gooseberry Jelly.—An excellent substitute for guava jelly. Wash six pounds of green gooseberries very clean after having taken off the tops and stalks. Add two quarts of water and let them simmer until they are well broken. Turn the whole into a jelly-bag, and let the juice drain through. Measure the juice and boil it rapidly for fifteen minutes; take it from the fire and stir into it, until entirely dissolved, an equal weight of sugar. Then boil the syrup from fifteen to twenty minutes longer, or until it jellies strongly on the spoon. It should be pale

ture is mine. I built it with my muscles and my brains. It is the evidence of my faithfulness, the certificate of my power." Their individual labor is swallowed up in some aggressive and successful commercial organization, and even their fellow workers hardly know when they come and when they go. In the face of such conditions, where are men and women to look for sources of comfort and reassurance? Not, it is evident, in external things. Their riches must consist of treasures of the mind; not in precious jewels, but in precious thoughts; not in plate, and pictures, and tapestries, but in serenity, and self-respect, and hope.

A few years ago a writer wrote something on this point, and, looking at life in a large manner, he came to the conclusion that all individual work is insignificant. "There is hardly anything to show for any lifework when a few years or centuries have passed," he said, adding: "So it seems, and yet if we knew better, we would certainly reverse that judgment. The exacter eyes of God are over all his works, and in their sight is no human action that is insignificant. The deeds are waiting our doing them, and God has trusted us not to fail. To take our labor thus is to pass from being artisans and to become artists under the Master Worker; for the real distinction between these two has nothing to do with the kind of work, but with the spirit in which it is done and the thoughts that lie behind it. The crucial question is whether we shall do our day's work as mere drudges, whose main interest is in counting the hours till evening, or as those who are fulfilling a high commission."

It may be truly said that it is not alone the large fact of life which is a trust, but the small detail of life that are trusts, too, and the smallest and least lovely task can acquire a dignity by the fine and enthusiastic performance of it. A great deal has been written about the beauty of patience, but it may well be asked, Is it not a mere stepping stone virtue, and one which leads down rather than up the hill of progress? Not patience, but enthusiasm, expectancy, pride in work, joy in the morning's opportunity, appreciation of the night's rest, are the things which sustain within us the spirit of youth and the power of doing. And, mysteriously but unquestionably, such a zealous attitude towards life brings its own reward. It is like capital placed out at interest; its value accrues. The pessimist may doubt this; he may say that for him there is nothing but heavy toil, and that "the sooner it's over, the sooner to sleep," but he will find that if he can shake off his torpor and discouragement life will open new avenues before him, and that a use will be found for those talents which he had thought in his self-doubt and gloom were lost for lack of

ATE SCHOLARS.

Lesson I.—The Power of Faith.—How were Jesus and his disciples met on their return to Capernaum? Who was Jairus? How did Jesus answer the request of Jairus? On the way to Jairus's house, whose faith did Jesus reward? What message did they receive by the way? What did they find on their arrival? What did Jesus do and say? What was the result? Tell how some others on that day had great faith, and how Jesus helped them.

Lesson II.—The Mission of the Twelve.—How long had Jesus and his disciples been traveling about together? What were some of the things he had tried to teach them? What was it now time for them to do? How did Jesus send them forth? What was their message, and what power did they have? Name the twelve and tell what you know about them. What were some of the directions Jesus gave them? How can we help to give Jesus's message to the world?

Lesson III.—The Question of John the Baptist.—How had John the Baptist angered Herod and Herodias? How had they punished him? Where was his prison? What question did the two disciples of John ask of Jesus? How did he answer them? What message did Jesus send back to John?

Lesson IV.—Warning and Invitation.—What change in Jesus's preaching is shown in this lesson? To whom had Jesus given the most of this time and labor? What then was expected of them? What caused the grief and sadness of Jesus's words? What invitation did he give? What did he mean by his "yoke"? Have you accepted this invitation?

Lesson V.—Two Sabbath Incidents.—What miracle did Jesus perform at Bethsaida? What effect did this have on the Jews? How did Jesus and his disciples again arouse their criticism? Why did the Pharisees say that this was unlawful? Where did the next discussion of the Sabbath take place? What question was asked of Jesus? What miracle did the perform before them? How do you keep the Sabbath day?

Lesson VI.—The Temperance Lesson.—What do you know of the authorship of the book of Proverbs? What is the character of the book? What are our lesson verses said to be? What results follow the use of intoxicating liquors? What is the only safe rule for us to make? What is our duty to our neighbor in this connection? Where do you stand in the battle to-day against intemperance?

Lesson VII.—Growing Hatred to Jesus.—What miracle is related in the verses just preceding this lesson? What did the people in general say of it? What was the criticism of the Pharisees? Give some arguments of Jesus. Against what did Jesus warn them? For what did certain of the scribes and Pharisees ask? Why was this a wicked demand? What was the great sign that would finally be given them?

Lesson VIII.—The Death of John the Baptist.—What was the cause of John's imprisonment? Why did not Herod kill him at once? Who was most anxious for his death? What happened on Herod's birthday? What foolish promise did he make to Salome? For what had she planned with Herodias to ask?

feeding of the five thousand? What did Jesus wish to do? What occurred when the disciples were on their way? How did Jesus go to help them? How did this affect the disciples? Tell about Peter and the trial of his faith. When Jesus and Peter were in the boat, what happened? How was Jesus welcomed when they reached the shore?

Lesson XI.—The Canaanitish Woman.—What were some of the reasons why Jesus wished to go away? Where did he and his disciples go? How did they live while there? Who sought them and asked for help? How did Jesus test her belief? What did he say of her faith finally? What did he do for her? What lesson did the disciples learn from this incident?

Lesson XII.—The Parable of the Sower.—Where did Jesus tell this parable? In what way did Jesus preach at this time? Tell the parable in your own words. Who was the "sower"? The soil? What four kinds of hearers did it illustrate? What is the "seed"? What sort of a "hearer" are you?

Lesson XIII.—Parable of the Tares.—To what group of parables does this belong? When did Jesus tell it? Why was it necessary? What is the story about? To whom did Jesus explain it later? What were the "tares"? How did Jesus explain the parable? How are you preparing for the great "Harvest Day"?

Lesson I. (Third Quarter.—Pictures of the Kingdom.—How did Jesus continue his teaching? What parables did he tell to the multitude? What did they illustrate? Where did Jesus go to explain some of the parables to the disciples? What other parables did he tell them? What was taught by the story of the finding of the treasure? How was the "pearl of great price" to be obtained? What was illustrated in the parable of the drag-net?

LOOKING.

Heb. 12: 2. Psalm 32: 8.

"Looking" are we with steadfast eyes
"Unto" the source of lasting good:
"Jesus" Thou dost forever prize
"The" purchase of Thy precious blood.

"Author and finisher" art Thou
"Of" all that makes Thy people strong:
"Our" souls are in Thy keeping now:
"Faith" in Thy name inspires our song.

And while we seek to see Thy face
And view the grandeur of Thy life,
We strength receive to run the race
And bravely bear the toil and strife.

Our "looking" by Thy sight is met;
Thy watchful eye fails not to see:
Thine "eye" upon Thy work is set:
Thou guidest those who look to Thee.

T. WATSON.

Granthurst, Ont., 1910.

THE ONE THING.

If I could have my choice of all
The things we mortals use,
I'd take an umbrella that
I simply couldn't lose.

Measure the juice and boil it rapidly for fifteen minutes; take it from the fire and stir into it, until entirely dissolved, an equal weight of sugar. Then boil the syrup from fifteen to twenty minutes longer, or until it jellies strongly on the spoon. It should be pale and transparent, and perfectly clear from scum.

Scalloped Ham and Eggs.—Butter: a deep earthen dish that will hold three pints, and spread over the bottom a layer of bread or cracker crumbs moistened with one-half cup of sweet milk and a little melted butter. Spread on this a layer of finely chopped ham that has been previously boiled or fried. Set in the oven till very hot. Beat six eggs, season with pepper and salt, stir in four tablespoons of cold sweet milk and pour over the ham. Bake until the eggs are set. After ten minutes, test by breaking the top with a spoon. If the milk shows, it is not quite done, and a few minutes more are required. Do not boil. Serve hot.

DESSERT.

Substitute for Shortcake.—A quick substitute for strawberry shortcake is to toast thick slices of fresh bread, butter liberally, and cover thickly with crushed and sweetened berries.

Delicate Orange Pudding.—Put two cups of water and one cup of sugar over fire. When boiling thicken with two rounding tablespoons of cornstarch. When clear and transparent add one teaspoonful of vanilla and a pinch of salt, pour over three good sized oranges that have been peeled, and cut into small pieces. Pineapples may be used instead of the oranges. Delicious served with whipped cream.

Ice Cream Without Freezer.—Beat the yolks of eight eggs very light and add thereto four cupfuls of sugar and stir well. Add to this little by little one quart of rich milk that has been heated almost to boiling, beating all the while; then put in the whites of eight eggs beaten to a stiff froth. Then boil the mixture in a pail set inside another containing hot water. Boil about fifteen minutes or until it is as thick as a boiled custard, stirring steadily meanwhile. Pour into a bowl to cool. When quite cold beat into it three pints of rich sweet cream and five teaspoonfuls of vanilla or such other flavoring as you prefer. Put it into a pail having a close fitting cover and pack in pounded ice and salt (rock salt), about three-fourths ice and one-fourth salt. When packed, before putting the ice on top of the cover, beat the custard as you would batter for five minutes steady, then put on cover and put ice and salt over it and cover with a thick blanket and let stand for an hour. Then carefully uncover and scrape from bottom and sides of the pail the thick coating of a frozen cream, making every particle clear, and beat again very hard until the cream is smooth, half congealed paste. Do this thoroughly. Put on the cover, ice, salt and blanket and leave it for five or six hours, replenishing the ice and salt if necessary.

SALADS.

Corn Salad.—Twenty-four ears of corn, two and one-half cupfuls of sugar—light brown is good—one-half box of mustard—put in as

much as you like; some don't like it quite so strong—one-half gallon of vinegar, two large onions, one medium sized cabbage, two green peppers chopped fine, and you can also add one red one of you like the red pepper taste. Salt to taste. Boil twenty minutes. Seal for winter use.

Strawberry Salad.—Cut large strawberries in halves lengthwise, sprinkle with powdered sugar and kirsch, and let stand in icebox until very cold. Arrange in nests of white lettuce leaves and garnish with halves of berries and chopped pistachio nuts. Serve with whipped cream seasoned with mayonnaise dressing which is highly seasoned with salt and paprika.

Orange and Mint Salad.—Peel sweet oranges cut in sections, free from skin and pith. Arrange on crisp lettuce leaves. Make a French dressing and pour over the whole. Sprinkle plentifully with freshly gathered mint chopped fine. Looks pretty and is refreshing in hot weather.

USEFUL HINTS.

Pies will be soggy if set on top of a hot stove after being baked.

Serve apple sauce of fried apples with roast pork or pork chops.

Stand charcoal in your larder and you will find that meat and milk will keep well.

Strip all your beds before breakfast and place where they can get plenty of air, and, if possible, a little sun, too.

Table linen, in order to bring out the bright gloss that makes it attractive, should be dampened considerably before being ironed.

To freshen a room add a little turpentine to the water with which the floor is scrubbed. It will take away that close smell and make the room delightfully fresh.

When scones are taken off the griddle they should always be laid on a cloth or wire tray with the last cooked side down. This keeps them soft for a long time.

When starching Holland pinafres if a little tea is put into the starch used they will keep their color, instead of getting that faded appearance we all know so well.

Scraps of soap should be collected together and saved until there is a fair amount. Then melt all the pieces and make them up together into a soap ball. If sand is mixed with them, these soap balls are excellent for removing stains from the hands.

Mattresses should be cleaned and re-made every three years if you want them to keep their springiness.

Slow eating should be encouraged in children, who must be taught to bite each mouthful thoroughly, as the saliva which is mixed with the food renders it easy to swallow and helps in its digestion.

Mattresses should be half-turned and allow it to stand in a draught, so that the air will play all round them. Pillows, too, should be treated in the same way if you want to keep them from getting musty.

Hens may be given egg shells in all seasons, with great advantage to the "hen-wife," provided that the latter, after letting them dry for a few days, breaks them very small and mixes them into soft food.

Brown onion sauce is delicious with chops or roast mutton. Slice

BRINGING UP THE PRINCES

HOW IT IS DONE IN THE ROYAL NURSERIES.

Stories Told of the Lives of the Children of the Present King and Queen.

Little Princes and Princesses, like other children, sometimes violate the discipline of the nursery or school-room, and when they do so they by no means escape punishments, which are frequently more severe than those meted out to children of less highly-placed people.

For example, lessons in the royal school-room begin at 6.30 a.m. in the summer, and 7 a.m. in the winter. The Prince who is late for school finds his breakfast curtailed to tea without milk or sugar, and bread without butter.

A story is told how, on one occasion, little Prince George declined to partake of any of this frugal fare, whereupon he suffered the pangs of hunger until his midday meal at noon, when, much to his disgust, he was offered the same food again; but this time he promptly accepted it.

STRICT DISCIPLINE.

The prince who neglects to prepare his lessons properly, maltreats his school books, or refuses to comply with the rule that all the Royal children when five years old are required to obey—namely, to speak in French or German during meals—is punished in different ways. One punishment is detention in the school room for an hour—or, perhaps, two—after lessons are over, when he is set some special task to do. A greater punishment is to be left at home when a visit to Lord's to see a cricket match, or more similar expedition, has been arranged.

No caning can be inflicted on the children of the Royal Family without the consent of the King; but he, though averse from inflicting this form of punishment as a general rule, does not believe in sparing the rod and spoiling the prince policy. For any repeated disobedience a child of the Royal house would be caned.

A RUNAWAY PRINCE.

A report of the progress of the Royal pupils in their studies, and on their general behavior, is submitted to his parent every month by their tutor. Any unfavorable remark in the report is sure to be followed by a lecture to the erring prince from his Majesty, and might possibly entail some special punishment.

On one occasion some remarks in the monthly report led to Prince George being detained at Marlborough House at Easter, whilst his brothers departed to the country to enjoy a fortnight's holiday. The particular offence which occasioned this punishment on the little prince was his violation of the rule prevailing in the Royal household that the children must never leave Marlborough House without special permission, and must, of course, always be accompanied by some member of the household when doing so. Prince George on two occasions managed to break bounds, and to get into Pall Mall by himself, but

HEALTH

FRACTURE OF THE HIP.

One of the greatest misfortunes that can happen to a healthy man or woman who has passed three-score and ten without the sorrows and infirmities which the psalmist has predicted, is to fall and break the hip.

By breaking the hip is meant breaking off the head of the thigh-bone. Notwithstanding its exposure to injuries of all kinds from blows, falls and the shock of jumping, the hip is very seldom broken in youth or middle age, for this part of the thigh-bone is so strongly built that it will resist a very severe strain. In old age, however, the case is different. Then the head of the bone, instead of forming an oblique angle with the shaft, is so bent as to form nearly a right angle, and so stands the strain badly. Moreover, the bone shares with the other tissues in the atrophy of old age, and becomes porous and brittle. For this reason the aged are more predisposed to this injury than younger persons. The consequences of such an accident are also much more severe.

In the first place, there is the shock of the break and of the fall or other injury which produced it; and shock is badly borne by the aged. Then there is the enforced change in the mode of life which the accident brings about, the sudden abandonment of outdoor life, the walks and the drives. These things are important to any one, but they count far more seriously in the life of an old person than in one who is still young. The confinement to bed is irksome, and may be dangerous by reason of the bed-sores which are so likely to occur. The mental state is also unfavorable, for the old man or woman misses the variety and change of scene which walks or drives afforded, and misses also the stimulus of family life at meals and in the family gatherings.

In the treatment of a broken hip, therefore, the great object is to confine the leg by plaster bandage, splint or brace as soon as it can be done with safety, so that the sufferer may leave the bed and get about on crutches or in a wheelchair, mingle once more with the family, and get outdoors again.

In some very favorable cases the fracture is what is called impacted, that is, the broken ends have been pressed together in such a way as to hold each other. When this happens, union of the fracture is very apt to occur, but in most cases healing of the fracture does not take place, and the patient is condemned to a cumbersome brace for the rest of life. In any case, even the best, the leg will be shortened and stiff, and the patient's activities will be greatly curtailed, even if not absolutely arrested.

PAIN IN THE EAR.

Do not pour hot oil into the ear to relieve pain. Heat can be applied much better in a hot mixture of glycerine, alcohol, and water, which will not turn rancid or clog up the ear, and can be removed by wiping with water. A towel or

Fashion Hints.

SEEN IN PARIS SHOPS.

Hats do not match gowns. Afternoon frocks escape the ground.

Some of the newest raincoats are made with capes.

No one longer sees the stiff boned collar in the evening.

Crêtonne landings are again trimming summer coats and gowns.

For all styles of hair dressing parted hair is popular.

Parasols and stockings match the gown whether the shoes do or not.

White wash ribbons are fast replacing the colored ones for lingerie.

Changeable taffetas are in high favor for little summer afternoon frocks.

The fringe appears on wraps, the lower edge of skirts, hats and parasols.

Chiffon embroidered with chenille for a gauzy evening wrap is quite effective.

One of the new fancies in gloves is to put colored embroidery on the back of them.

The new cotton crepes have a deep crinkle and are just as prominent as ever.

The bow of tulle has disappeared. In its place one uses a long bar to fasten the collar.

Flowered net, shirred over a white Neapolitan straw hat, makes a novel and pretty effect for a dressy hat.

Red buttons and red embroidery give a note of contrasting color to pence frocks, whether in blue or in natural color.

Among the novelties in buttons are those of hand-carved ivory and also of pearl. Some of them are mounted in silver.

The assortment of travelling cases of matting is larger than ever. Metal or leather corners do much to save wear on the case.

Fruits are used as ornaments for the dressy coiffure to-day. Cherries are the favorite, though grapes and other small fruits are seen.

One of the newest rosettes for millinery use is made of tiny flowers which are first sewed into a chain and then wound round the hat.

THE OLD POISONED ARROW.

Not so Deadly as It is Generally Supposed.

The famous poisoned arrow of the African savage is not always so deadly a weapon as it sounds. In fact, it may be absolutely harmless. After having killed an old buffalo bull near the N'gari Kiti swamp, says M. E. B. Bronson in his recent book, "In Closed Territory," he noticed a small black shaft about the diameter of a slate-pencil standing perpendicularly out of the animal's right loin, near the spine, and six inches in front of the hip. One of the natives said, with a laugh, "Other hunters have been out long before you, Bwana, but their resas (cartridge) was not as good as yours; that is a Wandereboon poisoned arrow." It was

the latter, after letting them dry for a few days, breaks them very small and mixes them into soft food.

Brown onion sauce is delicious with chops or roast mutton. Slice some onions finely, and fry them in dripping to a nice brown, stir in to them some rich brown gravy, boil up, season with pepper and salt, and serve.

To make a carrot pie, scrape and boil the carrots until very tender, then mash, and to 1 cup of carrots add 1 pint of milk, $\frac{1}{2}$ teaspoon each of salt, cinnamon and ginger, 1 egg to taste. Bake slowly in one crust.

To clean a white felt hat put some flour in a basin, and cover it up and put it in the oven until it gets quite hot; then take a piece of white flannel and rub the hot flour thoroughly into the felt, then dust it off with a clean white cloth, and the hat will look like new again.

When making chicken with dumplings use the fat skimmed from the stewed chicken as shortening for the biscuit. They will be rich, light, and tasty, much better than those made with butter or lard.

When making children's dresses a double piece is placed under the arms, a lot of trouble will be saved when the dress begins to wear, as the frayed edges can be darned to the under pieces, thus saving the trouble of patching.

Laundry tubs should always be made quite clean after they have been used. Wooden tubs are best preserved by leaving a little cold water standing in them; zinc tubs may be cleaned with ammonia, and must be thoroughly dried to prevent rust.

It is not generally known that castor oil may be most easily taken mingled with orange juice, a little sugar being added to the juice if the orange is not sweet. The difference between this and any other method of taking this valuable medicine is surprising.

Brooms and brushes will last longer if given an occasional bath. Put 4 tablespoonfuls of ammonia in two quarts of lukewarm water. Stand the brushes in this for half an hour, bristles downwards. Rinse thoroughly in cold water, and hang in a cool place to dry.

The practice of putting dishes in the oven to warm them for the table in a bad one. The dry heat causes the enamel to crack in time, and then the grease soon penetrates them to their utter ruin. Put the dishes to be heated in a dishpan, and pour boiling water over them. Let them stand and steam until ready to serve the meal, then wipe with a clean, dry towel.

To make clear fruit jellies far superior to the old method of cooking the fruit. Late in the afternoon take the fruit, currants, strawberries, or any kind of fruit, place in a large wooden bowl and mash well with the hands, add half as much water as juice extracted. Let stand over night. In the morning the juice will have collected on top clear as crystal. Pour off the juice, leaving sediment in bowl which may be made into jam. Add hot sugar to the juice, one pound of sugar to pint of juice. Heat the juice before adding sugar. Boil for twenty minutes and pour into scalded jelly glasses. Seal with paraffin.

This method is quicker, makes a clearer jelly than the old way of using jelly bag, straining, etc.

Marlborough house without special permission, and must, of course, always be accompanied by some member of the household when doing so. Prince George on two occasions managed to break bounds, and to get into Pall Mall by himself, but his progress further afield was stopped by the sentry on duty.

MUST SALUTE.

There are certain customs and formalities which the Royal children are taught to observe carefully from their earliest years. For example, each little prince, after he is five years old, must be scrupulous to return the salute of soldiers or sailors, by whom he is always saluted when they pass him if they know who he is. He must always, of course, be equally careful to return the salute of officers and members of the household. On one occasion Prince Eddie, when leaving Marlborough House, neglected to return the sentry's salute.

The little prince was promptly ordered back by his tutor and made to acknowledge the salute in the proper manner.

SPECIAL HOLIDAYS.

The birthdays of the King and Prince Eddie are observed as holidays among the Royal children.

Sometimes the holiday is spent in London, or some special expedition to a cricket or football match may be arranged. Any grave breach of discipline on the part of a young prince, however, entails forfeiture of this holiday.

AN AMBUSH FOR WASPS.

Special Fondness of the Queens for Rhododendrons.

A curiosity in natural history that must surpass all records has been observed in a garden not far from Aldershot, says the London Daily Mail. A number of wasps were heard buzzing about a particular rhododendron bush. The gardener summoned the owner of the garden, and the two proceeded to slaughter. Within half an hour fifty queen wasps had been killed.

The next day a number more were buzzing about the bush under the same fatal but obscure attraction. It was noticed that the wasps were only attracted to this single bush, which is one of many. A suggested reason is that the flowers were a little further advanced and so more full of honey; but as a rule color is almost as strong an allurement as scent or the honey sense.

It is not unusual for a few queen wasps to be killed at this season, when the time for nest making is approaching, but this quantity is unparalleled. The experience suggests that the wasp might be exterminated, supposing this to be desirable, if we all grew specimens of this favored flower. The special fondness of queen wasps for white flowers of particular sorts has been observed before, and some gardeners grow such on purpose, but fifty in half an hour is a new record of slaughter.

The queens were killed by pinching the flowers into which they dived and which served as a shroud to the quantity of bodies lying around the deadly ambush of the rhododendron.

Respectability is often the only consolation that poverty has.

Do not pour hot oil into the ear to relieve pain. Heat can be applied much better in a hot mixture of glycerine, alcohol, and water, which will not turn rancid or clog up the ear, and can be removed by swinging with water. A towel or large pad of gauze wrung out in boiling water and closely applied over the ear, covered with oil-silk or "protective" rubber tissues, is better than a hot-water bag.

A SIMPLE REMEDY.

When one has a cold attended by an aggravated cough, a simple method of relief is found in putting one drop of oil of tar on a lump of cube sugar, leaving it until the sugar absorbs the oil. Eat the sugar slowly, allowing it to dissolve in the mouth. Often a consumptive is greatly relieved in the same manner, while severe colds and coughs with pneumonia find speedy relief in the simple home remedy.

METHODICAL MR. BLINKOM.

Mysterious Gain of Two Minutes Made Clear to Him Later On.

"I am, I have been all my life," said Mr. Blinkom, "a very methodical man. I rise at a certain hour, take my breakfast at a certain time and start down town daily always at a certain minute by the clock; but this day for some unaccountable reason I found myself starting two minutes early, and really it quite disturbed me. I couldn't understand how or where I had gained that two minutes.

"But that wasn't the only bewildering thing that was to happen to me this morning. At the office when I took off my hat the office boy before he could check himself started back from me with a look of astonishment. A man who came in to see me five minutes later looked at me for a moment with what was clearly amazement, and another man who came in a little later still started back a step when he saw me with 'Er-r-r—hm-m—ha—' before he collected himself and got down to business.

"Then at a later time yet when I sent for my stenographer, who is commonly very calm and sedate, why, when she came in she all but laughed at me this morning, and she seemed to be quivering with merriment over something all through my dictation. What could it all mean? Really I was lost in wonderment over it all until it came time to go out to luncheon, when as I was drying my hands I happened to see myself in a mirror. Then I was ready to laugh after I had got over my first amazement.

"My head looked like that of the wild man of Borneo, my hair was so mixed up and twisted and tumbled, I had somehow forgotten to comb my hair this morning, and no wonder I had created a commotion. But I was glad of one thing. This made it all clear to me how I had come to gain that two minutes in starting away from home, and that was a satisfaction to me anyway, for I am so very methodical."

GERMANY DEPENDENT.

Owing to the rapidly growing population of Germany, especially in the industrial cities and towns, and the relative scarcity of productive land, the nation becomes each year more dependent upon foreign countries for its food supply.

spine, and six inches in front of the hip. One of the natives said, with a laugh, "Other hunters have been out long before you, Bwana, but their reas (cartridge) was not as good as yours; that is a Wanderoboo poisoned arrow." It was true, as we found proved, when, after five minutes' cutting and tugging, the arrow-head was withdrawn from the bull's tough back muscles.

It was a remarkable example of the great power of the Wanderoboo bow. From its sharply barbed point to its base the arrow-head was five and a half inches long, and four and a half inches of its length had been driven through the half-inch hide and on into the heavy muscles of the loin.

Since it stood perpendicularly in the loin, it must have been shot into the bull while he was passing beneath a tree, or when he was drinking directly below some overhanging bank, both methods of attack favorites of the light-armed Wanderoboo.

While the Wanderoboo poison is deadly to beasts within five to twenty minutes when it is fresh, applied to arrow-heads in this dry climate, it cures to the hardness of enamel in a few weeks and becomes harmless. Luckily for the old bull, it was evidently such an old disvenomed arrow that had, perhaps by mistake, or as the last in the quiver, been driven into him.

The poison is made from the bark of a bush much like a laurel, which is boiled down and down until it becomes a thick, gummy, concentrated extract. So prepared, it is thickly smeared over the barbed head and three or four inches of the shank or shaft.

How the plant is known botanically, or whether it is known at all, I am unaware, but it bears a purple fruit, quite the shape and about the size of a small olive, which I understand is not itself poisonous.

So armed, the Wanderoboo tackle and kill anything, from the tiniest buck up to elephant, their favorite tactics a silent shot from a brush shelter built within five or ten yards of a much-used watering-place. Such primitive shooting covers one sees daily above springs and along streams in mountains and plains of the Wanderoboo country.

This particular arrow-head the old bull carried would plainly have gone much deeper had it not struck a rib, for as found, the thin head was bent almost to right angles with its shank by contact with bone.

That it was a very old wound was obvious, for not only was it entirely healed, except local irritation about the head, but in places where the hard black enamel-like coating of the poison was worn away the shank was much rusted.

TOUGH LUCK.

"I bumped up against tough luck this morning," said the man on crutches.

"How was that?" asked his friend.

"Popleigh started in to tell me some of the bright sayings of his four-year-old son and heir," answered the other, "and having a sprained ankle I couldn't get away."

The less a man says the more he is supposed to be able to say if he wanted to.

The Canadian Order of Foresters

The Thirty-First Annual Session of High Court

The Year 1909 Was the Most Prosperous in the History of the Order—A Large Delegation in Attendance.

The thirty-first annual session of the High Court of the Canadian Order of Foresters opened in the City of Montreal, Tuesday afternoon, 14th inst., with a large number in attendance, including High Court Officers and delegates representing every Province of the Dominion.

After the usual opening ceremonies and the appointment of the several standing committees, the High Court Officers submitted their reports which showed the Order to be in a most flourishing condition.

The High Chief Ranger, J. A. Stewart, of Perth, Ont., after extending a hearty welcome to the representatives present, submitted his report, which was replete with facts and figures relative to the growth and extension of the Order during the past year.

On the 1st of January, 1909, the Order had a membership of 70,759, and there were initiated during the year 7,369 new members, being an increase of 772 over the previous year. During last year 3,652 members lapsed and 459 died, leaving the net membership at the close of the year 73,985.

The increase in the Insurance Reserve of the Order during the year amounted to \$273,367.75. On January 1st, 1909, the amount on hand in this Branch was \$2,728,940.54, and at the close of the year \$3,002,308.89. The amount paid in death claims was \$463,979.66.

The Sick and Funeral Benefit Branch is also in a flourishing condition. During the year no less a sum than \$144,321.20, covering 5,950 claims, was paid in this Branch. The amount to the credit of this fund at the close of the year was \$170,773.82.

The Report of Geo. Faulkner, High Secretary, covering the general work of the Society, was next in order, and showed in detail the large volume of business transacted through the Head Office at Brantford.

The amount of Insurance premiums received during this year was \$616,017.62, which with the large sum of \$121,329.79, derived from interest on investments, made the total receipts in this Branch \$737,347.41. There were 459 death claims paid, amounting to \$463,979.66, leaving the sum of \$273,367.75 to carry to the Reserve Fund, which at the close of the year was \$3,002,308.89.

The Sick and Funeral Benefit Branch of the Order also showed a marked advance. The amount of fees received during the year was \$165,591.50, and interest \$6,695.82, making the total receipts in this Branch \$172,288.32. There were 5,950 claims paid,

amounting to \$144,321.20, leaving \$26,967.12 to carry to the Reserve, which at the close of the year amounted to \$170,773.82.

There were 73,985 members in good standing at the close of the year carrying \$74,161,000.00 Insurance

There were issued from the High Secretary's office 7,538 Insurance Certificates, and 7,334 Membership Certificates, or a total of 14,872, and in addition there were endorsements made in 1,512 Insurance Certificates.

The report of Robert Elliott, High Treasurer, showed the funds of the Order to be in the most satisfactory condition. The income in the several funds were: Insurance \$737,347.41, Sick and Funeral Benefit Fund \$172,288.32, and General Fund \$92,712.01. Total income \$1,002,347.74. The total expenditure in these funds was \$704,345.65. The surplus income over expenditure amounted to \$298,002.09.

The Insurance Reserve Fund at the close of the year was invested as follows: Municipal and School Debentures... \$2,753,816.47
Dominion of Canada Stock... 150,000.00
Deposits in Chartered Banks... 20,000.00
Current Accounts in Chartered Banks... 78,491.82
\$3,002,308.29

The total assets of the Order amounted to \$3,235,037.67, and its liabilities \$25,136.72. Assets over liabilities \$3,209,900.95.

The report of Dr. U. M. Stanley, Chairman of the Medical Board, showed the average death rate since the commencement of the Order to be 5.17 per 1,000 of membership. There were submitted to the Medical Board during the year 8,816 applications, of which 8,280 were accepted, and the remaining 536 rejected. The number of applications was 930 more than for the previous year, and was the second largest in the history of the Order.

The report of W. G. Strong, Superintendent of organization, showed that during the year there were 7,369 initiations, as against 6,597 for the previous year, an increase of 772.

At the close of the year there were 1,065 Courts in the order, representing a membership of 73,985. There were 515 Courts in Ontario, 178 in Quebec, 58 in Nova Scotia, 70 in New Brunswick, 15 in Prince Edward Island, 110 in Manitoba, 65 in Saskatchewan, 38 in Alberta and 16 in British Columbia.

Among those in attendance were the following: J. A. Stewart, High Chief Ranger, Perth, Ont.; D. Allan, High Vice-Chief Ranger, Grimsby, Ont.; Geo. Faulkner, High Secretary, Brantford, Ont.; Robt. Elliott, High Treasurer, Brantford, Ont.; Dr. U. M. Stanley, Chairman Medical Board, Brantford, Ont.; C. E. Britton, P.H.C.R., Gananoque, Ont.; J. A. A. Brodeur, Montreal, Que.; Alf. P. van Someren, McLeod, Alta.; W. M. Couper, Montreal, Que.; R. W. Wigmore, St. John N.B.; Members of the Executive Committee, W. L. Roberts, High Auditor, Brantford Ont.; J. P. Hoag, High Auditor, London, Ont.; W. Walker, High Registrar, Montreal, Que.; W. G. Strong, Superintendent of Organization, Brantford, Ont.; Lyman Lee, Solicitor High Court, Hamilton, Ont.; J. B. O'Regan, Chief Agent for Province of Quebec, Quebec, Que.; Hon. Colin H. Campbell, High Court Solicitor for Manitoba, Winnipeg, Man.; F. H. Davidson, D.H.C.R., Winnipeg; D. E. McKinnon, D.H.S., Winnipeg, and G. E. Anderson, D.H.C.R., Griswold, Man.

"He has just placed them in my uncle's hands together with a letter written by Carnoel to account for being in possession of this sum. It was sent to him, he claims, by a friend of his father, an anonymous friend."

"Or by an enemy who invented this ruse to ruin him. One of the two explanations is true, I grant."

At this moment a sound attracted Maxime's attention, and turning he saw a gardener approaching, a rake on his shoulder and watering-pot in his hand.

The height and broad shoulders of this man attracted his attention and on looking at his face, he recognized him immediately as the person who had been successively porter in the house in Rue Joffroy and protector of the false Madame Sergent.

This singular apparition drew from Maxime a cry of surprise, which made the suspicious gardener raise his head.

"What is the matter?" asked the countess, quietly.

"That man!"

"He has the charge of my flowers. He came to make the round of the conservatory, and is going off for fear of disturbing us."

In fact, the man with the rake, after respectfully taking off his straw hat, was retracing his steps.

"But he—he too knows the thief. It was he who formerly kept the house in Rue Joffroy, and afterward played the role of foreign lord, protector of this jade. I quarrelled with him, and we were to fight next day."

"You see it is well you did not do so. You would have crossed swords with a domestic."

"And you are not astonished to learn that your gardener is also the accomplice of this worthy friend of M. de Carnoel?"

"I am astonished at nothing; but I understand that everything will be a surprise to you, and the time has come to make known what I should have preferred to keep from you. Learn, then, that I know by whom and why this theft was committed."

"You knew it, and you did not tell!"

"Listen before you judge. And first remember that they took from your uncle's safe only a casket belonging to a Russian spy. You will object that they took also a sum of money. I will come to that presently, and will prove to you that things were not as has been supposed."

"Then the thieves were Nihilists?"

"The government which employs Col. Borisoff has other enemies than Nihilists. All the proscribed, all who defended the independence of Poland, and who live in exile far from their conquered country. This Borisoff's mission was to watch and denounce the Nihilists, whose aim is to destroy everything and the oppressed who still struggle against their oppressors. The casket deposited with your uncle contained written proofs of a vast conspiracy against Russian tyranny. The papers had been given up by a traitor, who has met with his deserts, and the patriots whom they compromised wished to regain them at any cost."

"And they could do no better than steal them."

"In their eyes the end justified

made his report to her who paid him.

"You are partly right. Only he was not paid, but he told what he had heard, and she whose destruction you swore, swore to regain possession of the bracelet. She had all the forces of the association of the proscribed at her disposal, and to recover the jewel which might have betrayed her, she made choice of a woman skilful and bold."

"The woman of the Rink!"

(To be continued.)

THE KAISER'S DAY.

As Early Riser He Devotes the Morning Hours to Business.

A Berlin paper in connection with the announcement that the Kaiser is prevented from writing by a boil on the wrist describes his usual method of work.

Like all Hohenzollerns, he is an early riser and is usually out of bed at 6. At his first breakfast, an hour after, he looks over some of the morning papers and the despatches of the official German news agency. Then he sits down at his writing table and goes through reports from the various Ministers and the press cuttings specially put together for him in the Foreign Office.

His remarks and decisions are written with a thick blue pencil on the margin of the different documents. At 9.30 o'clock the Ministers and other heads of departments are introduced by the adjutant in attendance to make verbal reports, particular days in the week being set apart for each official. These verbal statements are delivered in a style something like that of a cablegram, with all unnecessary words left out. At this stage the Kaiser has to sign his name many times, a proceeding he heartily dislikes.

After lunch, at which there are usually a number of guests and which rarely lasts more than half an hour, the Kaiser sometimes takes a ride in the Tiergarten. When he announces that he is going to spend an hour alone in his workshop with a book every one understands that he is about to take a nap.

At any hour of the day he is likely to be called on to form some more or less urgent decision or to write a telegram of condolence, sympathy or the like. Save on the occasion of the operation on his throat some years ago the Kaiser has never been disabled from work by serious illness. On the present occasion he has not handed over the reins of government to the Crown Prince, but only the commission to sign certain state documents.

MEXICAN FIRE DEPARTMENT.

Consisting of One Man, Burro and Rolling Water Barrel.

It might be thought that such an exciting thing as a fire would startle the Mexicans out of their habitual indolence, but such is not the case.

The alarm of a fire at Matamoros, Coahuila, Mexico, was given by the discharge of numerous pistols and guns, says a writer in the Wide World Magazine, and I hastened to the scene, thinking at first that a battle was raging.

After a long interval, during

THE MYSTERY CLEARED UP;

OR, THE HERITAGE OF MADAME

VALTA.

OR, THE HERITAGE OF MADAME YALTA.

CHAPTER VIII.—(Cont'd)

"The same which he had in preventing you from seeing me. He went to your house expressly to persuade you that I would be absent till to-morrow. This falsehood had an object. If I had not met you by a miracle, I should not have seen you to-day, and Villagos calculated that to-morrow you would no longer belong to this world."

"What! Villagos who boasts of his devotion to you; Villagos conspire against you! I dare not say against us, though you do me the honor of including me in the prosecution you accuse him of meditating."

"Do not jest. Nothing is more serious; I will prove it to you presently. In the meanwhile let us talk of something else. Have you seen your cousin since the events of last night?"

"I have just seen her."

"Alone?"

"No; her father was present. The scene was a very painful one. I did not conceal from her what I thought of M. de Carnoel. Alice did not contradict me, but she declared positively that she would never marry."

"That signifies that she does not believe a word of your allegations, and that she intends to be constant to the absent one until his innocence shall appear. She is a woman; she has faith."

"You approve, then, of her persevering in her allusions?"

"Assuredly."

"And I have been counting on you to make her listen to reason!"

"Not a word more. We will resume our conversation in a few moments, for here we are."

The Russian trotter had vanquished the distance, and though Madame Yalta had taken the longest route, they were entering the Avenue de Friedland by the Place de l'Etoile.

She stopped Nedji before the little gate by which Maxime had first entered with Dr. Villagos. This private entrance opened at a stroke of the bell by the valet de pied, who took the reins and received from his mistress an order in a foreign tongue.

The countess passed in first and took a side walk which wound through a lawn and ended in an immense conservatory.

"Here," said Madame Yalta, "we may speak freely; no one will interrupt us."

"Not even the doctor?" asked Maxime, laughing.

"No; if he comes he will be told I have not returned."

"Do you intend never to receive him again?"

"I shall see him once more for the last time."

"He has, then, decided to pass over to the enemy?"

The question to which Maxime attached no importance made the countess start.

"No," she replied, slowly; "it is I who wish to separate from him."

And as Maxime seemed astonished, she added,

"Come, you shall know all."

At one of the extremities of the conservatory, was a rendezvous furnished in a manner appropriate to a sylvan boudoir; divans covered with Japanese stuff, rocking chairs and a bamboo table.

"So," said Madame Yalta when they were seated, "You saw M. de Carnoel last night?"

"I had a glimpse of him, for he simply appeared and disappeared. Borisoff brought him in a close carriage, which he drove himself under a good escort, to the house where his accomplice awaited him. He left it almost immediately by scaling the garden wall. What means the woman took to draw him from the clutches of this Russian, I cannot tell, but I am anxious that you should know that her associate and auxiliary in this enterprise was your fencing-master."

To Maxime's great amazement, this revelation was received with perfect indifference.

"Ah!" she said tranquilly, "you recognized Kardiki?"

"Yes, though he was dressed as a gentleman. He dined at Borisoff's with M. Borisoff who treated him like a comrade, and never suspected, certainly, the trick that was about to be played on him."

"Kardiki is very adroit."

"But do you not think he is betraying you?"

"Why? He is a Polish refugee and has a right to counteract the designs of a Russian spy."

"Then you do not take in bad part that he should have aided a pair of rogues, for this creature and this Carnoel have been associated with the people who opened my uncle's safe with a false key."

"You are mistaken. M. de Carnoel does not know them, and he saw last night, for the first time the woman who rescued him."

"But she at least is, beyond doubt, a thief."

"No more than he is."

"You are not aware that they found on this wretch the fifty thousand francs taken from the safe."

"It was M. Borisoff who found them, was it not?"

by a traitor, who has met with his deserts, and the patriots whom they compromised wished to regain them at any cost."

"And they could do no better than steal them."

"In their eyes the end justified the means. Two of them resolved to make the attempt."

"And one of them was a woman."

"Yes; a woman devoted to the cause she served—devoted even so far as to sacrifice her life, and more than her life—her honor. The other was a Polish refugee, who had passed ten years in the mines of Siberia, to which Russian despotism had condemned him, and was prepared to do anything for the sake of vengeance."

"Prepared to do anything; that is just the word," said Maxime, between his teeth.

The misfortunes of the Polish insurgents affected him very moderately, whilst he had true tradesman-like ideas of the sacredness of a banker's safe.

"They went together one evening," resumed the countess, "and reached your uncle's offices without difficulty. Some one awaited them there who had procured a key, and indicated the word to open it. The woman wanted to operate herself, and you know what it cost her. He who gave her the information was ignorant of the terrible mechanism, whose claws seized her hand as she introduced the key into the lock."

"I had no difficulty in guessing the beginning of the story, and I know the end. But I have often wondered what came to pass when the thief found herself caught."

"She whom you call the thief tried to extricate herself," replied the countess. "Her friends tried to deliver her. They could not discover the spring that had to be touched to withdraw the apparatus. Time was passing; some one might have come in, and if she had been surprised all was lost. She did not hesitate. She commanded the man who accompanied her to cut off her hand."

"And he consented to render this frightful service?"

"He was under her orders; he obeyed. He had a poniard, large and sharp; with one blow the hand was severed."

"And this strange heroine did not die? She did not fall fainting on the floor?"

"She had strength to stand, and conquered her pain. Her companion, who had served in war, knew something about wounds; he tied up the wrist, and led off the wounded woman, who was scarcely able to stand."

"She was dressed as a man, was she not?"

"Yes."

"Then it was she and her accomplice whom Vignory and I met in the gateway. We saw the light, and entered the office."

"Where you found the hand. To remove it your friend Vignory touched the spring. You believed yourselves alone, but some one saw you—heard you. This thief, as you call her, knew that you had taken her bracelet, and that it was your intention to search for her, to conduct by yourself an inquest which belonged of right to the agents of the prefecture of police."

"Good! the traitor heard my conversation with Vignory and

The alarm of a fire at Matamoros, Coahuila, Mexico, was given by the discharge of numerous pistols and guns, says a writer in the Wide World Magazine, and I hastened to the scene, thinking at first that a battle was raging.

After a long interval, during which the people watched the fire with interest, chattering among themselves meanwhile, there appeared placidly trundling along the road the Matamoresan equivalent of a fire engine, a barrel rolling along the ground, drawn by a reluctant burro.

A swivel pin in each end of the keg permitted it to roll freely and ropes attached it to the animal. Behind walked the fire brigade, a solitary peon, bearing a bucket. Arrived at the scene of the conflagration, the water in the barrel was poured into buckets and hauled to the roof of an adjacent house, whence it was flung onto the flames.

Everybody was greatly excited. The calmest thing of all was the fire, which burned steadily on till there was nothing left to consume. Then as the spectacle was over the people dispersed. Every one was satisfied, except perhaps the unfortunate owner of the house that had been destroyed.

A SAFE MEDICINE FOR ALL CHILDREN.

The mothers whose little ones are ill not only wish for a medicine that will make their babies better but one that positively cannot do any harm. Such a medicine is Baby's Own Tablets. They are sold under the positive guarantee of a government analyst to contain no opiate, narcotic or other harmful drug. They always do good; they cannot possibly do harm—not even to the new born baby. Concerning them Mrs. J. E. Z. Marchand, Ste. Anne de la Perade, Que., writes:—"I find Baby's Own Tablets indispensable. As soon as I find one of my children not feeling well I administer the Tablets and I am never disappointed in the result. I would not be without them and am enclosing fifty cents for two more boxes." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A JAPANESE COMPLIMENT.

The Japanese have ever the instinct of politeness. It may happen, however, as in the case recorded below, that their idea of a compliment is not precisely that of the one to whom they wish to show courtesy. The story is told by Inspector-General Hornaday.

"I remember a little Japanese who attended one of our banquets," he said, "and a queer compliment that he paid to a colonel's wife."

"I sat between the two, and the lady said across me:—"

"Mr. Takashiru, you compress the ladies' feet in your country, don't you?"

"Oh, no, madam; that is a Chinese custom," said Takashiru. "We Japanese allow our ladies' feet to grow to their full size. Not that—"

"And he bowed and hissed in the polite Japanese way:—"

"Not that they could ever hope to rival yours, madam!"

TONIC TREATMENT FOR INDIGESTION

The Process of Digestion is Controlled by the Blood and Nerves

If you have indigestion and you begin a course of treatment to make your stomach stronger, you are on the right track for a real cure. You can never cure yourself by eating predigested foods, or by taking purgative medicines. The stomach is not doing its own work under these treatments, and there can be no real cure until the stomach is strong enough to digest all the food necessary to maintain the body in normal health. The great aim of the tonic treatment for indigestion in all forms, is to strengthen the stomach to a point where all foods eaten will digest easily and nourish the body. A tonic that will strengthen the stomach is what is needed, as the process of digestion is controlled by the blood and nerves. Dr. Williams' Pink Pills are an ideal tonic. They actually make new, rich blood, and thus bring strength and tone to the stomach. This has been proved over and over again, and thousands of grateful people have not hesitated to say so. Here is an instance:—Miss Eva Tocher, Balmoral, Man., says:—"I am writing this letter on behalf of my mother who wishes you to know how much Dr. Williams' Pink Pills have done for her. For several years she had been greatly troubled with indigestion and notwithstanding the medicine she was taking the trouble was growing worse. Every meal was dreaded, and left behind it a feeling of nausea and severe pains. As this continued she began to lose strength and energy, and was hardly able to do any housework. Acting on the advice of a friend she began to take Dr. Williams' Pink Pills, and soon began to feel better. She continued taking the Pills until she had used ten boxes, when her health was fully restored and she could take any kind of food without the least discomfort. Since that time she has not had the slightest return of the trouble."

Thousands of cured men and women speak from experience of the benefits derived from Dr. Williams' Pink Pills in cases of indigestion, anaemia, rheumatism, general weakness, pains in the back and side, neuralgia St. Vitus dance, and the troubles that afflict women and growing girls. These pills are sold by all medicine dealers or by mail at 50 cents a box, or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A young man wishing to have a bit of fun at a farmer's expense passed a few remarks about his cattle and his garden, and then said he had set some lettuce and cabbage had grown up. Then the farmer said:—"Oh, that's nothing. I set some carrot seeds, and what do you think came up?" "Don't know," replied the young man. Farmer—"Why, old Brown's donkey, and ate the lot."

A Sure Corrective of Flatulency.—When the undigested food lies in the stomach it throws off gases, causing pains and oppression in the

BEST FED RACE ON EARTH.

Savant Commends Hebrew Diet, but Fruitarian Differs.

The people of Britain, especially town workers, can do a great deal toward stamping out tuberculosis by copying the Jewish prescriptions with regard to food, says Dr. Allison, a prominent English physician and an authority on food values. In a lecture, Dr. Allison set up the example of the Hebrews, a race which was, he said, practically immune from consumption.

The Jewish people, he maintained, through centuries of oppression had survived because it was the best fed race on earth. Jewish mothers were greatly to be commended for bringing up their children on fatty foods.

Professor R. A. Sampson does not agree with Dr. Allison on this point. In the *Fortnightly Review* he makes this plea for the fruitarian diet.

"Perfect fruit alone can meet the demands of the human system, perfect fruit alone can stimulate the intellect, perfect fruit alone can calm the passions, perfect fruit alone can control the feverish activity of the arterial pulsations, which otherwise, engendered by the consumption of inflammatory foods and drinks, wear out the human machine long before its natural time."

DEAF, LISTEN!

You have used Horns, Trumpets and other Mechanical Devices in the hope of being able to hear, but always found the expected satisfaction was spelled "Disappointment." If you write to Ernest Pratt, 468 Yonge Street, Toronto, you will learn some good news. Do it to-day—better still—do it now!

HIGHER CRITICISM.

Georgiana was making preparations for her doll's birthday party and her brother stood by helplessly, receiving instructions. "Oh, Palmer," she exclaimed suddenly, "first we must take this child over to church and have her criticised."

When going away from home, or at any change of habitat, he is a wise man who numbers among his belongings a bottle of Dr. J. D. Kellogg's Dysentery Cordial. Change of food and water in some strange place where there are no doctors may bring on an attack of dysentery. He then has a standard remedy at hand with which to cope with the disorder, and forearmed he can successfully fight the ailment and subdue it.

"Well, did he pay you?" asked the wife of a dentist who had been to collect a bill for a full set of false teeth that he had made for a man almost a year before. "Pay me?" growled the dentist. "Not only did he refuse to pay me but he actually had the effrontery to gnash at me—with my teeth!"

SHREDDED

A meat diet is too heating

Shredded Wheat is the natural summer food. Cooling, yet full of rich nourishment. All the strength-giving elements of the whole wheat. A biscuit covered with fresh fruit is enjoyable. Serve with cream and sugar.

Sold by all grocers, 15c. a carton, two for 25c.

WHEAT

MAPLEINE

A flavoring used the same as lemon or vanilla. By dissolving granulated sugar in water and adding Mapleine, a delicious syrup is made and a syrup better than maple. Mapleine is sold by grocers. If not send 50c for 1 oz. bottle and recipe book. Crescent Mfg. Co., Seattle, Wa.

McKenzie Mine at Elk Lake Has Started Bagging Ore

Successful Operations at the Mine Which Make the Property a Coming Shipper.

ELK CITY, May 4.—With the opening of navigation, which is now in full swing, the greatest of activity prevails at the various mines and prospects in this vicinity and the city is rapidly recovering from the recent fires.

The district is likely to become another Cobalt and the veins run to depth with values. Among the shippers and properties bagging ore are the Lucky Godfrey, the Borland-Thompson, the Devlin and the Moose Horn mines.

The Moose Horn mine put in a new plant this spring and are now sinking a mine at the 125-foot level on a vein which has shown values from the surface.

In the midst of the mines is the McKenzie, a group of five properties on which work has begun last January. They have been fortunate from the start and soon hope to rank with the shippers.

The engineer in charge, Mr. Harry McMaster, reports that the vein on location 846 of the company's group at a depth of 50 feet continued steadily the whole distance and showed free silver all the way with the exception of four feet. Several hundred feet of stripping has already been done, resulting in the discovery of two additional veins, one of which is 7 inches wide, cutting at an angle of six degrees. It is the intention to continue this shaft to the 75 or 100 foot level, then drift to the McKenzie vein.

where the new 7 inch vein crosses. Mr. McMaster states that in his opinion this week will result in the placing of the value of the mine beyond question. The necessary buildings have now all been erected, including bunk house, cooking camp, managers dwelling, blacksmith shop, powder house, and the necessary machinery is being installed. A good wagon road has been built from the main road which parallels the road from Elk Lake.

The McKenzie company are in a very fortunate position, owning a group of five properties which have been thoroughly tested. Six assays made from the veins of which the company are now working have shown results of from 400 ounces of silver up as high as 15,000 ounces to the ton.

This company is under good management, and it is the opinion of the engineer in charge and those who have seen the property that it should be brought to the shipping stage in a very short time, 600 pounds of good ore having been bagged by May 1, and the work in this regard being pushed rapidly from day to day.

Application is being made to list this stock on the New York Curb. The Transfer Agents are The Trusts and Guarantee Company of Toronto and the Guarantee Security and Transfer Company of New York. I am offering 50,000 shares of this stock at 25c per share, subject to prior sale. Write or wire me your subscription at once.

known, replied the young man.
Farmer—"Why, old Brown's donkey, and ate the lot."
A Sure Corrective of Flatulency.
—When the undigested food lies in the stomach it throws off gases, causing pains and oppression in the stomachic region. The belching or eructation of these gases is offensive and the only way to prevent them is to restore the stomach to proper action. Parmelee's Vegetable Pills will do this. Simple directions go with each packet and a course of them taken systematically is certain to effect a cure.
Medical Professor—"What is the result, young gentleman, when a patient's temperature goes down as far as it can?" Student—"Why—er—he gets cold feet!"
Minard's Liniment Lumberman's Friend.
Mamma—"Yes, dear, the angels can hear everything; they heard your prayers last night." Effie—"That's funny; I didn't say them."
MAKE A NOTE when you are leaving home to buy "The D. & L. Menthol Plaster." Guaranteed to cure the worst case of backache, headache, stitches. Avoid the "just as good" goods. Get the genuine.
Popularity depends a good deal on a man's ability to be right and agreeable at the same time.
Minard's Liniment used by Physicians.
THE GOOSE'S BABIES.
Dolly had just returned from a visit to her grandfather's farm, and was simply bubbling over with news of all the wonderful things she had seen.
Auntie came in for the greatest share, having more time and patience than busy mother.
"And were there any chickens and ducklings?" she asked, amused.
"Oh, yes, hundreds of them," was Dolly's enthusiastic reply.
"And also the sweetest little—little—oh! you know what I mean, auntie."
"Lambs," prompted auntie.
"No—oh, no!" exclaimed Dolly, impatiently. "little—little—little—dear me! What are a goose's babies called?"
Chambers—"I think a man should never miss an opportunity of improving his mind. I don't wish to boast, but I can truthfully say that I began to improve my mind as a young man, and have gone on doing so ever since." Chubbs (reflectively) — "Great Scot! What a state your mind must have been in when you started on it!"

Lawyer—"What is your occupation?" Witness—"I'm a piano finisher." Lawyer—"Be a little more definite. Do you polish them or move them?"

Your Druggist Will Tell You
Murdine Eye Remedy Relieves Sore Eyes, Strengthens Weak Eyes. Doesn't Smart. Soothes Eye Pain, and Sells for 50c. Try Murdine in Your Eyes and in Baby's Eyes for Scaly Eyelids and Granulation.

Biddle—"Gashan is about as thoughtful a man as I ever met in all my travels." Darton—"Is that so?" Biddle—"Yes; the other night, before knocking a fellow down who had insulted him, he rang the night-bell of a doctor, so that the fellow should not wait for surgical attendance."

The Foe of Indigestion.—Indigestion is a common ailment and few are free from it. It is a most distressing complaint and often the suffering attending it is most severe. The very best remedy is Parmelee's Vegetable Pills taken according to directions. They rectify the irregular action of the stomach and restore healthy action. For many years they have been a standard remedy for dyspepsia and indigestion and are highly esteemed for their qualities.

Ask for Minard's and take no other.

TRUSTWORTHY.
"Rufus, you old loafer, do you think it's right to leave your wife at the wash-tub while you pass your time fishing?"
"Yassah, jedge; it's all right. Mah wife don't need any watching. She'll sholy wuk jes' as hard as if I was dah."

Bad Blood

is the direct and inevitable result of irregular or constipated bowels and clogged-up kidneys and skin. The undigested food and other waste matter which is allowed to accumulate poisons the blood and the whole system. Dr. Morse's Indian Root Pills act directly on the bowels, regulating them—on the kidneys, giving them ease and strength to properly filter the blood—and on the skin, opening up the pores. For pure blood and good health take

Dr. Morse's
Indian Root Pills

TRANSFIGURATION.

One morning Jenkins looked over his garden wall and said to his neighbor:
"Hey, what are you burying in that hole?"
"Oh," he said, "I'm just replanting some of my seeds; that's all."
"Seeds!" shouted Jenkins angrily. "It looks more like one of my hens."
"That's all right. The seeds are inside."

The man who marries for money should be willing to take the humiliation that goes with it.

Ont.
A certain sergeant was drilling a dozen recruits, and after a few days' drilling and teaching he found that he had not made any impression on them whatever. He decided to tell them a tale, which ran as follows:—"When I was a boy my mother bought me a dozen wood-soldiers, which I drilled and tried to instruct, but without any result, of course. Then I lost them one by one, and now I have found you again, you wooden duffers!"

Magistrate (to prisoner)—"Did you really call this gentleman an old fool last night?" Prisoner (trying to collect his thoughts)—"The longer I look at him the more probable it seems to me that I did."

You cannot be happy while you have corns. Then do not delay in getting a bottle of Holloway's Corn Cure. It removes all kinds of corns without pain. Failure with it is unknown.

Probably the easiest kind of easy mark is a man who labors under the delusion that he understands women.

RICH AND POOR ALIKE use Painkiller. Taken internally for cramps, colics and diarrhoea. Applied externally cures sprains and swollen muscles, etc. Avoid substitutes, there is but one "Painkiller"—Perry Davis—25c and 50c.

Sweet Child—"Say, pa, you must be a pretty strong man?" Pa—"Fairly so, my dear. Why?" Sweet Child—"Cause uncle said when he went out with you the other night you carried the biggest load of any man he ever saw without showing it."

Time Has Tested It.—Time tests all things, that which is worthy lives; that which is inimical to man's welfare perishes. Time has proved Dr. Thomas' Electric Oil. I'm a few thousand bottles in the early days of its manufacture the demand has risen so that now the production is running into the hundreds of thousands of bottles. What is so eagerly sought for must be good.

TWO FACTORS.

Selique—"I was surprised to hear that the Smith-Jones engagement had been broken. Do you know what caused the rupture?"

Lacquer—"Yes, it was caused by two simultaneous discoveries made by the girl."

Selique—"Two simultaneous discoveries? What were they?"

Lacquer—"The discovery that her fiancé was short of money and the discovery that she was short of love."

PILES.
You will find relief in Zam-Buk! It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? All Druggists and Stores—Six boxes.

MARBLE AND GRANITE MONUMENTS.

First English Horse Races.

Chester possesses plausible claims to be the birthplace of the British turf. It was one William Lester, who about 1609, "being mayor of Chester, did cause three silver bells to be made of good value to be run for upon the Roode Dee." This seems the earliest definite establishment of a horse race. From the nature of the prize was derived the proverb "To bear the bell," though the bells in this case existed long before the "ring." Our ancestors being more easily satisfied in the matter of amusement than their degenerate descendants, there was apparently only one contest. The "Chester cup," which has been substituted for the "best bell," is now worth £2,500, to say nothing of Cheshire cheeses for the three placed horses.—Westminster Gazette.

Had a Mere Trifle.

A doctor calling on a patient who had been very ill, but was now convalescent, said to the latter's wife:

"You must be careful in regard to his diet for a few days."

"Yes, I know that," was the reply. "He has just had his dinner, and I didn't give him anything but a cup of coffee and two or three warm biscuits and a piece of pie and a couple of doughnuts and one slice of bread with gooseberry preserves on it. I have just been telling him he couldn't have anything very substantial right away until his stummick was stidder."—New York Tribune.

A Proud Prerogative.

"When can a boy be said to have arrived at man's estate?"

"When he begins giving his old clothes to his father."—St. Louis Republic.

A Change Impending.

He—if you accept me it will make another man of me, but if you refuse me I shall never be the same man again.—London Punch.

It is as easy to deceive oneself as it is difficult to deceive others.—Rochefoucauld.

IT IS NOT IN THE BLOOD

Medicine Taken Internally Cannot Cure Eczema. It is Caused by Germs.

Eczema cannot be overcome by ordinary treatment and the old-fashioned way of dosing the system with drugs. Eczema is caused by a parasitic germ that bores into the skin. It is generally a contagious disease. Until the parasite is completely destroyed and removed, eczema cannot be cured. Fully one-third of skin diseases are in the form of eczema.

We so thoroughly believe that Rexall Eczema Ointment will overcome eczema and allied skin ailments, that we unhesitatingly promise to promptly return the money paid us for it should it in any way be unsatisfactory to the user.

Because of its remarkable cleansing

A WOMAN'S LOGIC.

It Helped Her Out When the Customs Officials Bothered Her.

On one of the recently arriving transatlantic steamers was a young woman whose extreme economy had not permitted any lavish expenditure abroad. But she had repeatedly referred with commendable pride to the material for two silk dresses she had purchased at a bargain which she was bringing home for her mother and sister. Even the suggestion of one sympathetic listener that she would have to pay duty produced merely a temporary restraint.

Finally when the liner approached New York and the custom house officer received the somewhat plain woman at the cabin table her fellow passengers were curious. Being asked the usual questions about dutiable property, she replied stoutly and defiantly that she had the material for two silk dresses.

"Are they for yourself?" the inspector wanted to know.

"No, they are not," she declared. "I am bringing them home for presents."

"Then since they are not for your own use I shall be compelled to charge you duty," and he figured out for her the required amount.

Taking the pencil from his hand, she figured for a moment and then said: "Well, I declare! That has made those dresses cost me so much that I simply can't afford to give them away now. I'm just going to keep them for myself; that's what I'll do!"—New York Tribune.

LET THE YAWN COME.

A Good One is a Splendid Thing For the Whole Body.

A good, wide, open mouthed yawn is a splendid thing for the whole body. A yawn is nature's demand for rest. Some people think they only yawn because they are sleepy, but this is not so. You yawn because you are tired. You may be sleepy also, but that is not the real cause of your yawning. You are sleepy because you are tired, and you yawn because you are tired.

Whenever you feel like yawning just yawn. Don't try to suppress it because you think it is impolite to yawn. Put your hand over your mouth if you want to, but let the yawn come. And if you are where you can stretch at the same time that you yawn just stretch and yawn. This is nature's way of stretching and relaxing the muscles.

Don't be afraid to open your mouth wide and yawn and stretch whenever you feel like it. Indeed, if you are very tired, but do not feel like yawning, there is nothing that will rest you so quickly as to sit on a straight back chair and, lifting your feet from the floor, push them out in front of you as far as possible, stretch the arms, put the head back, open the mouth wide and make yourself yawn.

Those tense nerves will relax, the contracted muscles will stretch and the whole body will be rested. Do this two or three times when you are tired and see what it will do for you.

KEEPING HIS RECORDS.

Unusual Business Methods of a Merchant in Western Canada.

In the Bookkeeper's recorded a case which clearly comes under the head of "unusual business methods." In a thickly settled prairie district in western Canada, not far from Moose Jaw, a few Canadians had opened up a coal mine, the product of which they sold to the surrounding farmers. Settlers would come in wagons and sleighs and load their own winter's fuel, which

Synopsis of Canadian Northwest Land Regulations.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 81 acres solely owned and occupied by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section along side his homestead. Price, \$3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent, and cultivate fifty acres extra).

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.00.

all Eczema Ointment will overcome eczema and allied skin ailments, that we unhesitatingly promise to promptly return the money paid us for it should it in any way be unsatisfactory to the user.

Because of its remarkable cleansing, antiseptic, germicidal, soothing and healing influence, Rexall Eczema Ointment has a very pronounced value in the treatment of skin diseases, especially where the form of ailment is of the chronic, aggravating sort. We highly recommend it for the dry scaly form or the weeping type, where there is a constant flow of ill-smelling excretion.

Rexall Eczema Ointment is very prompt in relieving pimples, blotches, skin discolorations, ringworm, acne, nettle rash, tetter, hives, ulcers, insect bites, and for healing sores and wounds. It is a pleasant smelling, grayish-white ointment, and is very cleanly for use. Two sizes, 50c and \$1.00. Sold only at our store, The Rexall Store—T. B. Wallace.

Pretty Much Alone.

In a rather rabid discussion in parliament a member of doubtful ability and power twitted Disraeli for having deserted his camp.

"I did not know that the honorable gentleman had a camp," Disraeli replied in a tone of mock surprise. "I have always looked upon him as the solitary sentinel of a deserted fortress."

No Chance For Leniency.

"Can't you be merciful and love me a little?" he pleaded as they sat in their steamer chairs.

"I can't show you any mercy at all," she whispered. "This isn't the quarter-deck."—St. Louis Star.

The Skeptic.

"Pa, what does 'skeptical' mean?"
"Well—er—did you ever see a man taking in the washing for fear of rain in spite of the weather prediction 'fair'?"—Buffalo Express.

ern Canada, not far from Moose Jaw, a few Canadians had opened up a coal mine, the product of which they sold to the surrounding farmers. Settlers would come in wagons and sleighs and load their own winter's fuel, which cost them from \$1 to \$2 a ton, according to the run. It was early winter when I first made the acquaintance of this mine and its remarkable "superintendent," and my first reception from this individual was a fierce yell on his part, with the frantic brandishing of a long stick and the words: "What the devil are you doing? Can't you see? Are you stone-blind?"

I was literally walking through his books! Since morning—and this was at 3 o'clock in the afternoon—he had been keeping a record of outgoing sleighs and wagons of coal in the snow. About twenty farmers were drawing that day. With his stick he had written the initials of each in a clean spot in the snow and with that same stick had registered the number of tons they had taken away. I had spoiled one-half of his "books," and it was an hour before he became at all affable. I was still more astonished when I entered the "superintendent's" little board office. The walls were black with pencil marks, figures and names. A fire would have burned down his "book" of two years past.

Where Microbes Thrive.

The alimentary canal is the most perfect culture tube known to bacteriological science. No part of the body is so densely populated with micro-organisms. It is estimated that in the alimentary canal of the average adult about 128,000,000,000 microbes come into existence every day. They crowd this region so densely that scientists originally believed that they were indispensable to human life. According to a writer in McClure's, Pasteur, who first discovered them, maintained this view, but recent investigations have rather disproved it. There are many animals that exist in perfect health without any intestinal bacteria at all. Polar bears, seals, penguins, elder ducks, arctic reindeer—these and other creatures in the arctic zone have few traces of these organisms.

Not to Be Fooled.

A certain magazine once took to advertising by means of personal letters. A critic got this letter:

Dear Brown—Have you seen article in this month's Trash Magazine? Heavens, can it be true? X

But the critic, not to be fooled, sent to the editor of the Trash—in an unstamped envelope, so that double postage would be charged—this answer:

Dear X—I have seen one previous number of the Trash Magazine, and with heart and soul I hope never to see another. This is quite true. BROWN.

Progress.

"How is your boy getting on at school?"

"First rate," answered Farmer Corn-tassel. "He's goin' to be a great help on the farm. He knows the botanical names for cabbage an' beans already, an' all he has to do now is to learn to raise 'em."—Washington Star.

Why Captain Strachan was Nearly Dead.

A few months ago you could have seen a man whose life was a life of misery, doubled up with pains in the back, painful stitches flying through him. He was given up as incurable. Fig Pills cured him after three week's treatment. We guarantee you that Fig Pills will cure you, or your money back. 25c a box, at all drug stores.

FREE TO YOU—MY SISTER

I am a woman. I know woman's sufferings. I have found the cure. I will mail, free of any charge, my home treatment with full instructions to any sufferer from women's ailments. I want to tell all women about this cure—you, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourself at home without the help of a doctor. Men cannot understand women's sufferings. What we women know from experience, we know better than any doctor. I know that my home treatment is a safe and sure cure for Leucorrhoea or White discharge, Ulceration, Displacement or Falling of the Womb, Profuse, Scanty or Painful Periods, Uterine or Ovarian Tumors or Growths, also pains in the head, back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weariness, kidney and bladder troubles where caused by weakness peculiar to our sex.

I want to send you a complete 10 days treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that it will cost you nothing to give the treatment a complete trial; and if you should wish to continue, it will cost you only about 12 cents a week, or less than two cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer, if you wish, and I will send you the treatment for your case, entirely free, in plain wrapper, by return mail. I will also send you free of cost, my book—"WOMAN'S OWN MEDICAL ADVISER" with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. It cures all, old or young. To Mothers of Daughters, I will explain a simple home treatment which speedily and effectually cures Leucorrhoea, Green Discharge, and Painful or Irregular Menstruation in Young Ladies. Plumpness and health always result from its use.

Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell any sufferer that this Home Treatment really cures all women's diseases and makes women well, strong, plump and robust. Just send me your address, and the free ten days' treatment is yours, also the book. Write to-day, as you may not see this offer again. Address:

A MUSICAL PRODIGY.

Richard Strauss Composed Dance Music at the Age of Six.

Richard Strauss was a musical prodigy. His first effort at writing music was made at a Christmas celebration, says the Designer. Some children were dancing around the tree and singing a three part song. "I can compose music like that," said the six-year-old Richard to his mother. Thereupon he sat down and did so. But his mother was obliged to write in the words, because, although he could write music legibly, his pot hooks were too large. Strauss himself not only vouched for the truth of this story, but said that while he was still six years old he composed a polka and a schottische.

Richard was only fifteen when a symphony composed by him was brought out by Herman Levi, court conductor at Munich and conductor of the first performance of "Parsifal" at Bayreuth. When Richard came out to bow his acknowledgment of the applause which followed the symphony a man in the audience turned to his neighbors and asked, "What has that boy got to do with it?"

"Nothing," was the reply, "except that he's the composer."

Ancient Ideas of Africa.

In mediaeval times Africa was an unknown continent as well as Asia. Until a few years after the discovery of Columbus no one had sailed around it, and it was quite generally thought, as it had previously been thought in regard to Asia, that the African continent extended on and on indefinitely. It was supposed that far to the south was the zone of heat, in which no human being could live. This was by no means an unreasonable inference to the ancients. They knew that the farther they sailed to the north the colder it grew and that in the extreme north was a region of perpetual snow. They also knew that the farther they sailed to the south the warmer it grew, and what was more natural for them to suppose that if they went far enough in that direction they would come upon lands that were parched and baked and upon seas that boiled, where nothing could live but salamanders?

The Smile.

We talk of a smile of defiance. There is really no such thing. Such a so called smile is nothing more nor less than a snarl, a survival of the way our savage ancestors had of showing their teeth in order to strike fear into the hearts of their enemies. The real smile of pleasure begins with slightly opening the mouth, and is, of course, traceable to the joy of those same savage forefathers of ours at the prospect of food.

A Mean Comparison.

"Confound these railway time tables!" snapped Mr. Stubb as the long folder refused to remain closed long enough for him to place it in his pocket. "They remind me of a woman."

"The Idea!" replied his wife in surprise. "What is the comparison?"

"Why, they are hard to understand, and you can't get them to shut up."

An Old Story.

Doctor—I shall have to forbid you smoking, drinking and staying out late nights. Patient—Oh, doctor, be original! My wife's done that already.—Boston Transcript.

DR. MILES MEDICAL CO., Toronto,

A KING'S DOWNFALL.

Louis Philippe's Lack of Nerve When the Crisis Came.

Baroness Bonde wrote in her diary the following account of the abdication of Louis Philippe of France on the day of that remarkable occurrence:

"An aide-de-camp of the minister of war who was in the king's cabinet when he abdicated gave me a detailed account of this most signal piece of cowardice. He had reviewed the troops in the carrousel on horseback, highly roused, when a cry was raised, 'Voilà les Faubourgs!' No one had any orders; no one gave any. The mob rushed forward, shouting, 'Vive la garde nationale—vivent les troupes!' and shook hands with the outposts. The king retreated precipitately with his sons, and a sublieutenant of the national guard rushed into the palace asking to see him. He was admitted and in the greatest agitation said, 'Your majesty must abdicate.' 'Very well,' says the king. 'In favor of my grandsons.' 'No, unconditionally,' says the young and self elected mouthpiece of public opinion.

"Would you believe it? Of all who were congregated round the royal person Piscatory alone said: 'Go down and head your troops. Fight for your crown and your dynasty.' He was overruled, and they all marched out of the palace except the Duchesse d'Orleans, her children and the Duc de Nemours."

Boxing the Compass.

Boys who live in seaport towns are sometimes asked to "box the compass." If they can do it quickly and accurately they are fine sailors and may grow up to be the captain of a four master. If they miss a point or can only do it slowly they are land-lubbers and will never see blue water. To box the compass means to name all the points in order just as fast as you can speak. This is the way an old down east skipper will rattle it off: North, nor' by east, nor-nor' east, nor-east by north, northeast, nor-east by east, east-nor-east, east by north, east, east by south, east-sou-east, sou-east by east, sou-east, sou-east by south, sou-sou-east, sou' by east, south, sou' by west, sou'-sou-west, sou-west by south, sou-west, sou-west by west, west-sou-west, west by south, west, west by north, west-nor-west, nor-west by west, nor-west, nor-west by north, nor-nor-west, nor' by west, north. Can you do it?—Exchange.

Gunpowder and Artillery.

There is abundant evidence that the origin of gunpowder and artillery goes far back in the dim ages of the past. The Hindoo code, compiled long before the Christian era, prohibited the making of war with cannon and guns or any kind of firearms. Quintus Curtius informs us that Alexander the Great met with fire weapons in Asia, and Philostratus says that Alexander's conquests were arrested by the use of gunpowder. It is also written that those wise men who lived in the cities of the Ganges "overthrew their enemies with tempests and thunderbolts shot from the walls."

AWED THE STUDENTS.

Jean Richepin's First Lesson as an Instructor in Literature.

At the age of twenty-two Jean Richepin, the French poet and dramatic author, accepted a place as instructor in literature in a school which prepared students for the military college of St. Cyr. His employers warned him that the future army officers took very little interest in belles-lettres and that their principal occupation in class was raising chaos.

Richepin's first lesson began amid a storm of whistling and catcalls. But the young instructor's voice boomed out above the uproar and imperiously commanded silence. "Gentlemen," he said, "I am not here because I like it. I am here for my living. Is any one of you going to stand in the way? If there is, I should be obliged if he will tell me so face to face on the Place du Pantheon, where I am ready to meet him at any time. And inasmuch as we are all of us about the same age, you understand, of course, that the interview will be with bare fists."

And, so saying, young Richepin brought his clinched hand down upon the desk, and the desk broke in two, and he and his pupils lived happily ever afterward. Thus runs the official legend.—Argonaut.

Crafty M. Blanc.

Blanc, the founder of the Monte Carlo gambling resort, was well aware of the desperate character of many of his customers. Knowing that they included the scum and riffraff of the world, he took precautions against them. He never carried any money, which fact he announced so frequently and publicly that it was known everywhere along the Riviera that the millionaire Blanc never had a penny on his person. But he carried in a pocket-book a draft on red paper for several hundred thousand francs, payable to the indorsee. He feared kidnapping as much as robbery, and in case of abduction he intended to ransom himself with this draft. But the instructions at his office were not to cash a red draft with his signature unless a telegram was received from him ordering it to be done.

A Painful Process.

I was quite surprised one day when upon telling my little five-year-old girl, who was of a saving disposition, that I would put her pennies in the bank to have her educated to find that she burst into violent weeping and shouted, "I won't be educated; it hurts."

"Hurts?" I queried. "What do you mean?"

"I know," she sobbed. "They take a knife and scrape your arm and it swells up. I won't take my money to be educated."—Delineator.

Friends In Need.

"I don't put much faith in proverbs," said Brown to Jones. "For instance, look at the oft quoted one, 'A friend in need is a friend indeed.' Now, most of my experience with friends in need has been that they wanted to borrow. Give me the friends that are not in need."

HOW MANY REALIZE THE MARVELLOUS VALUE OF FRUIT — IN CURING MANY DISEASES?

Wonderful Success of "Fruit-a-lives"

—The Famous Fruit Medicine

Fruit juice consists of about 91% water, 8% of sweet matter, and only 1% of an intensely bitter substance. Careful experiments show that it is this bitter principle, which is the active or medicinal material of fruit juice.

Under certain conditions, the bitter principle can be made to replace or transform some of the sweet atoms in the juice, thus making a new compound which is much more active medicinally than the ordinary juice.

Many fruits were analyzed and it was found that the juices of apples, oranges, figs and prunes gave the best results. These fruit juices, having been made more active by the secret process of changing the sweet principle into the bitter, are combined with tonics and antiseptics and made into tablets. These tablets are the famous fruit medicine—"Fruit-a-lives"—known in every part of Canada for their wonderful curative qualities in diseases of the Stomach, Liver, Bowels, Kidneys and Skin.

"Fruit-a-lives" is the only medicine in the world made of fruit juices. 50c. a box, 6 for \$2.50 or trial size, 25c.

CHINESE CUNNING.

An Official's Subtle Scheme For Securing His Prisoners.

One of the funniest stories about Chinatown is not really Chinese. It was told by a British consul at one of the treaty ports. He arrested nine delinquent Chinese, intending to turn them over to the tender mercies of the native magistrate next morning. Meanwhile he gave them into the custody of a Chinese policeman, telling him to lock them up, though there was no jail at the consulate. But the policeman was equal to the emergency. He solemnly saluted, saying, "I obey!" and marched his men off. Soon he returned and announced that they were safely caged.

The consul was curious to see how and where. He followed his policeman to the yard. There he saw the nine prisoners dancing round the consulate flagstaff, lugubriously chanting the Chinese equivalent of "ring around a rosy." Whenever the dance showed signs of flagging the policeman stirred them up with a long pole. They seemed at first sight to be holding each other's hands, but, looking closer, the consul saw that they were handcuffed together.

"Well," said the consul, "if they are chained in a ring around the flagstaff they can certainly not get away. But why do you make them dance?"

"Ah," answered the Chinese policeman, with infinite cunning, "so that they cannot climb up the pole and get away!"

The consul broke out into a loud British laugh and tried to explain to the Chinaman that the nine prisoners could certainly not all climb up the pole at once, but the Chinaman had his idea and held to it. So the dance went on.—Harper's Weekly.

A Stage Name.

There is a story, well-known to the

THE BASTILLE.

Rise and the Fall of the Famous State Prison of France.

The famous French prison known as the Bastille was started on April 22, 1366, by order of Charles V. The Bastille turned out to be an important structure in history, and its fall on July 15, 1789, marked the beginning of the French Revolution. It was originally intended by Charles as a defense against the English. When it came to be used as a state prison it was provided with vast bulwarks and ditches. The Bastille had four towers of five stories each on each of its large sides. It was partly in these towers and partly in underground cellars that the prisoners were situated. It was capable of containing from seventy to eighty prisoners, a number frequently reached during the reigns of Louis XIV. and Louis XV., the majority of them being persons of the higher ranks. In its site now stands the Column of July, erected in memory of the patriots of 1789 and 1830.

The name bastille, or bastel, in ancient times was given to any kind of structure calculated to withstand a military force, and thus, formerly in England and on the borders of Scotland, the term bastel house was usually applied to places of strength and famed security. The French Bastille was originally called the Bastille St. Antoine.

Stephen Marcel, provost of the merchants, undertook the erection of the French Bastille. The building was enlarged in 1369 by Hugh Aubmot, provost of Paris under Charles V. He added two towers, which, being placed opposite to those already existing on each side of the gate, made of the Bastille a square fort, with a tower at each of the four angles.

After the death of Charles V., Aubriot, who had many enemies, was prosecuted for alleged crimes and was condemned to perpetual confinement in the Bastille, of which, according to some historians, he was the first prisoner. After some time he was removed thence to Fort l'Eveque, another prison, from which he was liberated in 1381 by the insurrection of the Maillotins.

After this insurrection, in 1382, the young king, Charles VI., still further enlarged the Bastille by adding four towers to it, each 100 feet high, thus giving it, instead of the square form it originally possessed, the shape of an oblong or parallelogram. To increase its strength the Bastille was surrounded by a ditch 25 feet deep and 120 feet wide. The road which formerly passed through it was turned to one side.

The Bastille from its commanding position was closely connected with important affairs in French history and was occupied by the Guisees in 1588, by Charles IV. in 1594, the Frondeurs in 1649 and Conde in 1652.

It was natural, therefore, that the Bastille should be one of the first objects of attack at the outbreak of the Revolution. In July 15, 1789, the populace of Paris, recruited chiefly from the Faubourg St. Antoine, attacked the fortress and stormed it after a half-hearted resistance by the governor, De Launay, and a handful of Swiss. The governor and seven of his men were killed, the archives of the prison scattered, and the prisoners, seven in number, were carried through the streets and hailed as victims of tyranny and martyrs in the people's cause. The building itself was torn down. The anniversary of the taking of the Bastille is celebrated every year as the national holiday of France.

A Tale of Russian Wolves.

A man was telling about an exciting experience in Russia. His sleigh was pursued over the frozen wastes by a pack of at least a dozen famished wolves. He arose and shot the foremost one, and the others stopped to devour it. But they soon caught up with him, and he shot another, which was in turn devoured. This was repeated until the last famished

his idea and held to it. So the dance went on.—Harper's Weekly.

A Stage Name.

There is a story, well-known to the theatrical folk, of how Ada Rehan, the actress, whose name was Ada Crehan, came to adopt the stage name of Rehan. Mr. Daly, tradition relates, was opposed to middle initials of his actors and actresses being printed in advertisements and programs. Just before Miss Rehan's appearance as a Daly recruit Mr. Daly was looking over some proofs of programs. His eye lit on "Ada C. Rehan," a compositor's error. He struck out the "C," and Rehan her name remained.

The Other Way.

"Then you don't want to leave foot-prints upon the sands of time?"

"Nix," answered the politician guardedly. "All I want is to cover up my tracks."—Louisville Courier-Journal.

The Noise Explained.

She (sternly)—I heard a noise very late. He (facetiously)—Was it the night falling? She—No, it wasn't. It was the day breaking.—Baltimore American.

The Glory of Life.

To be a strong hand to another in the time of need, to be a cup of strength to a human soul in a time of weakness, is to know the glory of life.

It is impossible to be just if one is not generous.—Roux.

by a pack of at least a dozen famished wolves. He arose and shot the foremost one, and the others stopped to devour it. But they soon caught up with him, and he shot another, which was in turn devoured. This was repeated until the last famished wolf was almost upon him with yearning jaws when—

"Say, partner," broke in one of the listeners, "according to your reckoning, that last famished wolf must have had the other eleven inside of him."

"Well, come to think it over," said the story teller, "maybe he wasn't so darned famished, after all!"

Got What She Wanted.

"I can stand for some things, but not for everything," said the clerk as he watched a stylishly dressed young woman leave the store.

"What is the matter?" asked the proprietor, who had walked up unobserved.

"That woman who just left hustled up to the counter and asked to see men's shirts. I showed her every style and color we carry. After inspecting the entire stock she rose and thanked me sweetly, adding: 'I didn't wish to purchase any. You see, I am making my husband some shirts, and I wanted to be sure I was doing them right. My husband is very particular about the finish of his shirts.' And they say married women are so considerate."

The boss smiled and walked away.—Boston Traveler.

"And hunter 'what boy—a for it." "I k parent er."

TEN MILLION DOLLARS Behind THIS GUARANTEE: The N Unhesitatingly Guarantees to Supply a Better Cash Register for Less Money Than

We expect to have to make this Guarantee good. Put it up to us as strong as you like. We're ready.

Total Adding National Cash Register at \$115, Ensuring you SAFETY in your cash dealings.

National Cash Registers make your business successful and profitable by giving you all the profit you make. Mistakes cost money. Daily losses by forgetting charge

sales, money paid out, mistakes in change, etc., all come out of your profits. What's the use of working hard for profits and not taking care of them? You can stop working against yourself and get your business on a profitable basis by using a National Cash Register. 800,000 merchants use Nationals and know this is true.

You are asking questions like these every day, and get some such answer. How long do you want to continue that way? The National Cash Register makes it unnecessary for you to ask anyone the detail of your business.

How much cash business did we do to-day
How much charge business did we do to-day
What is the total of my accounts outstanding
How much money have I in the bank
What is the amount of checks out
How much have I paid out this month
How much do I still owe for goods purchased
Are you sure the information you will give me will be correct

Well, I'll tell you, Mr. Jones, I can't give you all that information now. I haven't all the bills posted yet, and—

The National Cash Register Co.

SHERIDAN'S RUSE.

It Settled the Dramatist's Account With His Wine Merchant.

It is related of Richard Brinsley Sheridan, the dramatist and statesman, that, always in debt, he had among his creditors the brothers Challe, who were the partners in a wine firm in 1776.

One day when he was giving a dinner party to some distinguished people Sheridan sent for one of the brothers, told him he was now able to settle his account and invited him to the dinner party, asking him to come before the hour for some private conversation.

Challe arrived early, and he was no sooner in the house than Sheridan sent off a servant with a note to the clerk, desiring him, as Mr. Challe was favoring him with his company, to send as soon as possible three dozen of burgundy, two dozen of claret and two dozen of port, with a dozen of old hock.

The unsuspecting clerk sent the wine, with which the guests were so pleased that they asked where it came from. Sheridan, turning toward Challe, said, "I am indebted to my friend here for all the wine you have tasted and am always proud to recommend him."

It was not until the following morning that Challe realized the double meaning in Sheridan's words. The debt was canceled.

A Queer Fish.

A male fish which hatches the young of its mate is the Chromis paterfamilias. It is found in the Lake of Tiberias, Palestine. Strange to say, this industrious fish hatches its young in its mouth. When the female has spawned in the sand, the male approaches and draws the eggs into his gills, where they remain until hatched, when they struggle out of their confinement into the parent's mouth. As many as 200 perfect young are sometimes found in the mouth of an adult male. How the fish manages to feed itself without swallowing the young is a mystery. The grown fish is about seven inches long and one and three-quarters wide. Its back is olive green, shot with blue, and the belly is silver white, marked with green and blue. Near ancient Capernaum some hot springs form a small stream which runs into the lake, and it is in these warm waters that the chromis abounds.

No Common Dog.

Gentleman (to dog dealer)—I gave you a high price for this dog last week because you warranted it to be a good house dog. My mouse was broken into last night, and the dog never even barked.

Dog Dealer—No, sir; I quite believe for. He was too busy lookin' for the burglars, so as to be able to identify 'em, to even think of barkin'. If you was with this 'ere dog and was to meet 'em burglars he'd know 'em in a minute. He ain't no common barkin' dog; he's a reg'lar 'tective an' worth his weight in gold, he is.—London Answers.

Not Her Fault.

Mrs. Lapsling was expressing her regret that she had been unable on account of illness to be present at the funeral of a neighbor.

"I always feel," she said, "that I ought to attend the obloques of a friend, but I just couldn't go."—Chicago Tribune.

Inherited.

"And now," said Professor Longhunter as he greeted Henry Peck, "what shall we make of your little

What Other Papers Say.

Rosetown, Sask., Eagle.

W. B. Vandalstyne has a good supply of water. This will encourage others to dig for the precious fluid.

Kingston Whig.

The Duke of Sutherland, who owns 3,000,000 acres of choice land in England, is making a tour of Canada. Looking for more territory? First thing one knows he will be wanting a whole Province in our Northwest, but it will not be Manitoba until its boundaries have been extended.

London Advertiser.

There is more money in Ontario agriculture than ever before, but, during the past five years according to Mr. Flavelle, a blight has come upon the enterprise of Ontario farmers. They now realize fully what they owed to John Dryden. Duff is merely rattling around in Dryden's shoes.

Hamilton Times.

Perhaps never in the history of the world has any people presented such a marvellous record of growth and progress as has been presented by the Canadians in the thirteen years of Sir Wilfrid Laurier's rule, under the wise forward policy which his Administration has adopted. And without regard to party, race, creed or color, all benefit by it. The good of the country is the one object of the Administration. And the country prospers and the people are happy. And long may these conditions remain unchanged. Forward, Canada!

Woodstock Sentinel Review.

It should be possible, too, to simplify the work of the immigration inspectors and at the same time relieve the traveller from the annoying necessity of retelling his or her private affairs in the presence of a carload of people. The conductors, for instance, might be supplied with printed cards containing the questions which the department considers necessary to be answered. These cards might be left with those having tickets across the border, to be filled out in private, and afterwards taken up. The inspectors would still be free to make any further inquiries they might consider necessary. At any rate it should be remembered that Canadian citizens travelling on trains do not lose their citizenship, and that they will not submit to impertinent officiousness from either foreign officials on Canadian territory or Canadian officials anywhere.

Montreal Star.

For a Canadian to cross the frontier between Canada and the United States in either direction is to invite insult or annoyance. Going south, this is a matter for the authorities at Washington. If they favor a policy of non-intercourse, if in spite of all the talk about reciprocity, they do not want Canadians to spend money or to earn money in the United States, or even to visit friends and relatives in the United States, that is their business, but it is not our business to facilitate the annoyance of British subjects in Canada by gentlemen wearing American uniforms. Above all, it is outrageous that the Canadian traveller should be compelled to keep a dog to bark at him self, that Canadians returning from the United States should be constantly liable to insult from Canadian officials. The whole system of immigration re-

PE-RU-NA CHEERFULLY RECOMMENDED FOR COLDS AND CATARRH.

A Prominent Canadian Gives His Experience With the World-Famous Remedy For Catarrh.

Chronic Catarrh Always Begins With An Ordinary Cold.

So Says Dr. Hartman, the Greatest Living Authority On Catarrhal Diseases.

THE first effect of a cold is a thickening of the mucous membranes of the nose and throat.

This gives rise to a discharge, or at least a stuffiness of the nasal passages. Sometimes fever accompanies the first attack, also a feeling of languor, dullness and aching of the bones.

If no attention is paid to it, the mucous congestion is liable to spread down into the larynx, producing hoarseness and into the bronchial tubes, producing a cough.

Even when this occurs, many people pay no attention to it.

Under such circumstances, the congestion is liable to become chronic, producing a condition of the mucous membranes known as catarrh. Catarrh lasts an indefinite time. Catarrh is essentially a chronic condition and does not leave except something is done to relieve it.

What should be done when a person catches cold is to take a few doses of Peruna.

Taken at the onset, Peruna would break up the cold and prevent all the train of symptoms which usually follow.

But, even in cases where the cold has been neglected and hoarseness or a cough has developed, Peruna can be relied upon to give prompt and permanent relief.

The frequency of coughs and colds in the winter makes Peruna a popular remedy for these ailments.

A number of the best people of various countries have given testimonials as to the value of Peruna in such cases.

Followed Dr. Hartman's Advice—Restored to Health.

Mrs. Samuelle Vigneau, Avre au Berd, Isle de La Magdaline, Canada, writes:

"I write to tell you that I am perfectly well. I took only three bottles of your Peruna according to your advice and the directions in your book and it restored my health."

C. H. Parker, Ex-Warden of Compton Co., Quebec, has been mayor of Scotstown for a number of years. He is an influential resident in Scotstown and widely known.

He writes concerning Peruna. Read his letter below:

C. H. PARKER.

"I had several attacks of colds from time to time and finally a severe attack developed into catarrh.

"I was advised to use your celebrated catarrh remedy, and after taking three bottles I find myself completely cured, and I no longer suffer from catarrh or colds.

"I can cheerfully recommend Peruna for colds and catarrh."

If Peruna had no other medicinal value than the promptness with which it relieves common colds, it would be well worth while for any family to keep it in the house constantly.

POWDER AND GUNS.

Evidence That They Were Used Long Before the Christian Era.

There is abundant evidence that the origin of gunpowder and artillery goes far back in the dim ages of the past.

The Hindoo code, compiled long before the Christian era, prohibited the making of war with cannon and guns or any kind of firearms. Quintus Curtius informs us that Alexander the Great met with fire weapons in Asia, and Philostratus says that Alexander's conquests were arrested by the use of gunpowder. It is also written that those wise men who lived in the cities of the Ganges "overthrew their enemies with tempests and thunderbolts shot from the walls." Julius Africanus mentions

TO SWAMP THE LORDS.

A Threat That Always Brings England's Upper House to Terms.

To override the veto of the house of lords by a wholesale creation of peers is a plan that has been often threatened, but hardly ever put into practice. It certainly places the king in a very unenviable predicament—so much so that in 1719, after a crisis of the kind, George I. caused to be introduced into the lords a bill for limiting the power of the sovereign to create peers, a sort of royal self denying ordinance.

The measure was twice passed in the lords, but twice rejected by the commons, which was lucky, for had it been carried it would have made the house of lords an almost unchangeable body, entirely beyond the control of king or minister or commons.

"I know he has," replied the male
parent. "He inherits it from his moth-
er."

BLISTERS AND SUNBURN? TRY ZAM-BUK.

Blisters from paddling, ball-playing,
or any other cause, painful sunburn
itches, stings of insects, and chafed
places, are all eased instantly by Zam-
Buk. Don't have your vacation
spoiled by pain from any sore, which
Zam-Buk could cure in quick time!
This wonderful balm is made from
herbal juices and is highly antiseptic.
Poison from insect sting, barbed wire
scratch or thorn prick, is immedi-
ately rendered harmless as soon as Zam-
Buk touches it. Stops the stinging,
smarting pain. Zam-Buk is so pure,
too, that the most delicate skin is able
to absorb it, and is benefited by it.
Mothers with your babies should use
it for the chafing sores caused by per-
spiration, clothes-rubbing, etc. Also
good for piles, ulcers and festering
sores. All druggists and stores sell at
50c box, but refuse harmful imitations.

and by gentlemen wearing uniforms. Above all, it is outrageous
that the Canadian traveller should be
compelled to keep a dog to bark at him-
self, that Canadians returning from
the United States should be constantly
liable to insult from Canadian officials.
The whole system of immigration re-
striction between the two countries,
especially in the method of enforce-
ment, is unworthy of two civilized na-
tions and intensely revolting to the
good taste of both peoples. Custom
house restrictions are bad enough, but
they may be necessary evils. The sys-
tem of immigration inspection is an
insult to the common sense of two fair-
ly intelligent nations.

Dandruff is Now a thing of the Past.

To be troubled with the pest Dan-
druff, is merely through ignorance.
There has lately been discovered a
preparation called Salvia that abso-
lutely destroys the germ. This pre-
paration is sold with a strict guaran-
tee to cure. Dandruff and to make the
hair grow, or your money is refunded.
Salvia makes the hair grow in abun-
dant.
The hair becomes soft and fluffy. A
non-sticky, daintily perfumed, guaran-
teed preparation, used and endorsed
by the elite of England and Paris.
Mr. Jessop has just imported another
shipment of Salvia. A large bottle for
50 cents.

Children Cry FOR FLETCHER'S CASTORIA

Alexander's conquests were arrested by
the use of gunpowder. It is also
written that those wise men who lived
in the cities of the Ganges "over-
threw their enemies with tempests
and thunderbolts shot from the
walls." Julius Africanus mentions
shooting powder in the year 275. It
was used in the siege of Constantino-
ple in 688, by the Arabs in 690, at
Thessalonica in 904, at the siege of
Belgrade in 1073, by the Greeks in
naval battle in 1008, by the Arabs
against the Iberians in 1147 and at
Toulouse in 1218.
It appears to have been generally
known throughout civilized Europe as
early as 1300, and soon thereafter it
made its way into England, where it
was manufactured during the reign
of Elizabeth, and we learn that a
few arms were possessed by the Eng-
lish in 1810 and that they were used
at the battle of Crecy in 1346.—
Cassier's Magazine.

THE STICK CAME BACK.

Coleridge Was in the Habit of Losing
and Recovering It.
Of walking sticks there is no end.
For interesting sticks, however, the
one which Coleridge was in the habit
of losing during his tramping days
must take first place. The philosopher
was never happy till he had got it
back. He sent the crier round. Here
is the cry, as noted by Mr. Lucas in
one of his essays: "Missing, a curious
walking stick. On one side it displays
the head of an eagle, the eyes of which
represent rising suns and the ears
Turkish crescents. On the other side
is the portrait of the owner in wood-
work. Around the neck is a Queen
Elizabeth's ruff in tin. All down it
waves the line of beauty in very ugly
carving."
And then came the appeal and warn-
ing note: "If any gentleman (or lady)
has fallen in love with the above de-
scribed stick and secretly carried off
the same he (or she) is hereby earnest-
ly admonished to conquer a passion
the continuance of which must prove
fatal to his (or her) honesty. And if the
said stick has slipped into such a gen-
tleman's (or lady's) hand through in-
advertence he (or she) is requested to
rectify the mistake with all conven-
ient speed. God save the king!" The
stick came back!—London Chronicle.

The Early Circus.
Leaving out of count the great cir-
cuses of Rome and Antioch and com-
ing down to something of modern
times, the first circus in England was
on a footpath known as Halfpenny
Hatch, in the Waterloo road, London.
There, in 1770, Astley's first perfor-
mance was given, with the aid of a
drum, two fives and one clown. A
charge of sixpence was made for the
front standing places. There was no
building and not even a tent, but mere-
ly a ring of ropes and stakes. Primi-
tive as were the arrangements, Astley
soon attracted good audiences and was
able to add to his program conjuring,
transparencies, vaulting and tumbling,
with displays of fireworks. In course
of time he was able to hire an inclosed
ground and erected seats under a sub-
stantial roof. He called the place Ast-
ley's amphitheater riding house.

Dividing Her Weight.
"Don't stand on that delicate table to
hang the picture, Martha. It'll break.
You're too heavy."
"Oh, no, I'm not, mum. It'll bear
me. I'm standing only on one foot."
We are inclined to believe in those
whom we do not know because they
have never deceived us.—Johnson.

The measure was twice passed in the
lords, but twice rejected by the com-
mons, which was lucky, for had it
been carried it would have made the
house of lords an almost unchangeable
body, entirely beyond the control of
king or minister or commons.
The nearest approach that was ever
made to "swamping the lords" was in
1832, when the fate of the great re-
form bill trembled in the balance. Over
and over again the measure had been
passed by the commons, only to be re-
jected by the lords. The country was
furious. Payment of taxes was re-
fused. Riots broke out everywhere.
The prime minister, Lord Grey, went
to the king and begged him to create
new peers to carry the bill. His maj-
esty refused, and the ministry re-
signed. The king, however, presently
changed his mind and, fearing a revo-
lution, agreed to the creation of a hun-
dred new peers, "or more if necessary."
Then, very reluctantly, the upper house
gave way, and the bill became law.—
London Family Herald.

THE DEATH DICE.

A Murder Case in Which They Re-
turned a Just Verdict.
The German emperor some time ago
presented to the Hohenzollern museum
the "death dice" with which one of
his ancestors decided a difficult case
in the seventeenth century. The his-
tory of these dice is generally given as
follows:
A young girl had been murdered.
Suspicion fell upon two young soldiers,
Ralph and Alfred, who were suitors
for her hand. They both denied their
guilt, and even torture failed to ex-
tract a confession from either.
Then Elector Frederick William de-
cided to cut the knot by means of the
dice box. The two soldiers should
throw for their lives and the loser
should be executed as the murderer.
The event was celebrated with great
solemnity. Ralph had the first chance
and threw sixes, the highest possible
number. The dice box was then given
to Alfred. He fell on his knees and
prayed. Then he rose to his feet and
threw the dice with such force that
one of them was broken. The whole
one showed six, the broken one also
gave six on the larger portion, and
the fragment split off showed one.
This was a total of thirteen, one be-
yond Ralph's throw. The audience
held its breath in amazement.
"God has spoken!" cried the prince.
Ralph, appalled by what he regarded
as a sign from heaven, confessed his
guilt and was sentenced to death.—

ALL ABOUT HYPNOTISM

HOW YOU MAY PUT A SUBJECT TO SLEEP.

There are Some People Who Cannot be Hypnotized Under Any Circumstances.

We have heard a good deal about hypnotism, and many people must be anxious to try it for themselves.

You know what it is, don't you? You first catch your subject and then you make the necessary "passes," and he falls into a deep slumber and is no longer responsible for his actions. Very often you must meet people who are like that, but they have not all been hypnotized. In many cases it's their natural state.

The great secret of hypnotism is to have a steady eye and a strong will. As soon as you begin to hypnotize your man you must not take your eye from his till he shows signs of going to sleep. Don't, for instance, allow your mind to wander to his watch chain, as you wonder whether it is real gold or not, and whether he would miss it directly he woke up or not till next day. Many a promising hypnotist has lost his chances in life by grabbing at the spoil too soon, writes Mr. Arnold Goldsworthy in Pearson's Weekly.

When the head of the subject drops on his chest it will appear that the experiment has succeeded. But even then you must proceed with caution by putting to him some question of grave moment and carefully noting his reply. You might, for instance, ask him to lend you five dollars till Saturday, and if he says he will be only too pleased, you will know that he is no longer in his right mind, and that you can proceed with the next stage of the experiment.

If, however, in reply to your question he asks you whether you are going off your head, you will know that he is still very wide awake indeed, and requires a good deal of careful handling.

DON'T REMOVE VALUABLES.

Personally I dislike the kind of man who says he would like to be hypnotized, and then wakes up suddenly and ostentatiously removes his diamond scarf-pin for fear it should be mislaid in the rush. A thing like that shows a want of confidence in the hypnotizer, and unless your subject is prepared to trust you completely you will never succeed in sending him to sleep.

When once your subject is "off," however, he will usually be quite under your control, and if you ask him to hand you over his valuables he will do so with positive cheerfulness, and even tell you where he keeps the rest of his money and how you can get at it. I am studying hypnotism just now as diligently as I can. It seems to me that it beats working all to bits.

A good test as to whether your victim is under your control or not is to offer him a tallow candle and tell him it is a cigar. He will then bite the tip off and ask for a match.

Cases have been known in which the act of biting off the end of the candle has brought the victim back to himself with a sudden jerk and

Never lose your presence of mind for a minute, whatever you do, or else one of the company will have you by the scruff of the neck in two minutes, and you will have the handcuffs on you before you know where you are.

It is generally assumed that, when a man has been hypnotized and has not been awakened by the same influence that sent him to sleep, he will gradually fall into a natural slumber and wake up in due course of his own accord, but a raw amateur cannot afford to take a risk of that kind, and I know of no better way of settling the trouble than a hurried visit to some country where extradition laws are not yet in force.

Many people want to know what is the use of hypnotism, and while, of course, we cannot help pitying their ignorance, we will always do our best to explain. I mean, if it isn't any use to know that a man with a diamond ring and a fat watch-chain is absolutely at your mercy, and that when he wakes up he will be under the impression that he gave you the articles for a birthday present of his own free will—well, what's the use of anything?

TEETH EXTRACTED.

As a matter of fact, science has already found a use for hypnotism. There was an enterprising dentist once who tried hypnotizing his patients instead of giving them laughing gas, but the scheme didn't work very well.

He sent his patient to sleep and then got his grippers to work on the offending molar, and told the patient that he was peacefully asleep and therefore could not feel any pain. The patient replied in abrupt and emphatic terms that the dentist was not speaking the truth, as he was suffering agony, and, as it is selfish to keep a thing to ourselves, the patient got up and gave the dentist a feeling of pain as well.

As soon as the dentist could open his eye and had got his ear out of splints he took to using laughing gas again, and for the moment hypnotism is out of favor in dentists' parlors.

Another curious freak of science in reference to hypnotism was what was known as the transference of pain. By hypnotizing a couple of people it was claimed that a troublesome and painful complaint could be transferred from one to the other quite easily.

You might be suffering from acute neuralgia, for instance, while your friend Brown might be in the very best of health. The hypnotist would pass his hand over you and then command the pain to leave you and go into Mr. Brown. And then you would wake up feeling bright and jolly while Brown would be writhing in agony on the hearth-rug.

After a few experiments of this kind, however, it was found that this new boon to humanity was not all that it was cracked up to be. The number of people willing to bear toothache for someone else was found to be extremely limited; and if a doctor managed to transfer rheumatism from one of his patients to a hitherto healthy person, without the knowledge of the latter at the time, the doctor could only attend to his business after that under police protection.

It would seem, therefore, that if you have an ambition to become a hypnotist you should lose no time in strenuously trying to acquire

DON'TS FOR SWIMMERS

AND ALSO FOR THOSE WHO CANNOT SWIM.

List of Precautions Given by Members of Royal Life Saving Society.

Here are a list of very sensible do's for swimmers and also for those who don't swim by T. W. Sheffield, honorary member of the Royal Life Saving Society, of Regina. They have been published before, but the dangers they warn against are again to the fore. Mr. Sheffield would have them posted up at every bathing place or summer resort:

FOR SWIMMERS.

Don't bathe in unfrequented or secluded parts.

Don't swim away from shore, always along the shore.

Don't bathe alone if subject to giddiness or faintness.

Don't swim against the stream if you come across weeds.

Don't bathe shortly after dining; wait at least two hours.

Don't swim near dams, waterfalls, or where reeds are growing.

Don't dive into the water without first ascertaining the depth.

Don't swim without protecting your ears if subject to ear trouble.

Don't sit in a boat or stand about undressed after being in the water.

Don't swim too far out in the sea or lake unattended by a boat or an expert swimmer.

Don't swim without company if you have a weak heart, and only after consulting a doctor.

Don't swim far after a hard day's work, or over-exertion after other forms of exercise.

Don't dive out of or try to get into a boat from the side; dive from the stern and get in from the stern, but only then from a boat with a broad beam.

Don't take fright if you fall into the water with your clothes on; remember, clothes float, and assist you to float. Make for the shore, swimming with the tide or stream.

Don't swim without some recognized signal to give your fellow-swimmers, if subjected to cramps, such as lifting one arm out, shouting for help. Don't abuse this; leave the water as soon as possible.

Don't take fright if seized with cramp; keep cool; turn on the back and endeavor to rub the place affected. If the leg is drawn up with pain, swim slowly with the arms only. All swimmers should practice this.

FOR NON-SWIMMERS.

Don't throw the hands or arms out of the water.

When canoeing take a life belt if you are not an expert.

Don't go beyond the depth of your hips if you can't swim.

Don't plunge or struggle when you find yourself in deep water.

Don't grasp any person who approaches you; do what he tells you.

Don't attempt to get into a boat coming to your rescue; catch hold of the stern until assisted to get in.

If you follow out these directions when in distress in the water you

KEEPING NAVY'S SECRETS

STEALING OF PLANS GUARDED AGAINST.

Detectives, Disguised as Firemen, Keep an Eye on Inquisitive Strangers.

At all the shipyards that build for the British Navy the most careful precautions are taken to prevent inquisitive strangers from learning what they are not intended to know. The shipyard hands themselves are watched as closely as are visitors, for in a yard employing fifteen or twenty thousand men it is impossible for any one manager or foreman to know the faces of all the men.

The precautions taken differ slightly in the various yards, but the following description of the methods adopted by a great shipbuilding firm on the Clyde will show the care that is taken to insure that every man on the premises is there for a lawful reason.

Everyone of the thousands of employees has to carry a brass ticket with a number punched on it. This he has to produce on demand when working on the new warship. There are always several detectives on board, some of them dressed as firemen, so that a man may be asked for his ticket and his name two or three times a day. In any suspicious case the workmen's register is consulted. If the number and the name do not tally there is trouble.

DETECTIVES EVERYWHERE.

At every entrance to the yard other detectives are stationed. No one carrying a parcel, however small, is allowed to enter, in case that parcel might contain a camera.

When the workmen are leaving the yard at night these detectives stop about one man in twenty and search him from head to foot.

The plans of the new warship are kept under lock-and-key when not actually in use. Plans of ordinary vessels, on the other hand, are left lying about on the drawing-office desks for convenience. The drawing-office itself is, of course, formally locked every evening.

Detectives are sometimes stationed at the gangways leading on to the new ship to make assurance doubly sure.

The engine-room and the range-finding apparatus are the parts of the ship that have the most valuable secrets to keep. The range-finding apparatus is part of the fire-control station, and on a battleship is placed inside the mast, just where the three tripods meet.

To show the care taken to keep these secrets one might mention the case of an apprentice engineer who, boy-like, one day slipped up to see what the mysterious range-finding apparatus was like. When he left he forgot his chisel, which had an initial scratched on it. For weeks after there were the most searching inquiries after the owner. But the owner was prudent enough not to claim his property.

CAUGHT SMOKING.

The detectives once determined to make sure that no one was stowed away in the submerged torpedo-

in under your control or not is to offer him a tallow candle and tell him it is a cigar. He will then bite the tip off and ask for a match.

Cases have been known in which the act of biting off the end of the candle has brought the victim back to himself with a sudden jerk, and as soon as he opens his eyes and finds what you have been making him do, there is just a chance that he may be very rude about it.

And then, again, it sometimes happens that, from some cause that science has not quite satisfactorily explained, the person hypnotized does not come completely under the control of the operator.

A SLEEPY SUBJECT.

There was a rather awkward case recently where a hypnotizer was experimenting in a London drawing-room before a distinguished company. The young man who had been hypnotized suddenly observed that he felt frightfully sleepy and was going to bed, and he had got his coat and waistcoat off before he could be awakened and brought back to his company manners.

The ordinary hypnotizer must always act very promptly. Directly his victim is asleep he must be told that he has no will of his own, but must obey his master in all things. If this precaution is not promptly taken the victim may begin to dream and commence to act upon the fancies that come into his brain.

For instance, suppose you have succeeded in putting to sleep a man about twice your own size, and are trying to think up some way of making him look cheap before the girls. If he thinks of something first, there is a danger that he will be master of the situation.

He will get up all at once and say that he is a well-known heavyweight champion and that you and he are having ten rounds for a purse of fifty pounds and half the gate money. And while you are trying to understand what language he is speaking he will have caught you a nasty clipper under the ear, and will be imploring you to hold your face up so that he can smash it into pulp.

It is therefore as well for the hypnotizer to make sure that the door behind him is wide open and that he has a clear-run, in case the question of his mastery over his victim should be disputed by that gentleman himself.

Some people say there is no danger in hypnotism, while others contend that, on the contrary, it is not a game for everyone to play at. You see, when you have succeeded in getting your man off to sleep, you have always

GOT TO WAKE HIM UP AGAIN.

Nothing is more disconcerting to the average hypnotist than to find that the sleeper absolutely refuses to wake at the word of command, but remains sleeping on like a log of wood. What is to be done in such a case?

Well, a book I once read on the subject says that the first thing for the hypnotizer to do is to keep cool. Don't lose your presence of mind. Explain to the horrified company around you that you must run upstairs and get your patent magnet which never fails, and as soon as you are outside the room you must make a bolt for the front door and get over to New York as quickly as you can.

Without the knowledge of the doctor at the time, the doctor could only attend to his business after that under police protection.

It would seem, therefore, that if you have an ambition to become a hypnotist you should lose no time in strenuously trying to acquire some other and less exciting hobby. It is the only way.

DOCTOR'S OCEAN PRACTICE.

For One Trip, Travelling Physician Got \$5,000.

A few years ago there came back from Europe an American physician who has become such a great traveller that an acquaintance once asked him how he could manage to cross the ocean so much and still keep up his practise.

"To tell the truth, I practise as I go," he replied. "I have a small regular income, enough to keep me going in a Bohemian way, and not only does my travelling not cost me a cent, but I make good money of it."

"You see there are many persons who are afraid of a long trip. If they can afford it they decide to take along with them a doctor who may know them and their constitution. I have a pretty large acquaintance here, and in England, and the chances are that when I get bitten with the travel bug, which happens at least twice a year, there is generally somebody to wire me that he wants a trip and wants me to go with him. I have crossed the Atlantic as many as five times in one year."

"You see I have picked up several languages. I speak French and German fairly well, and can hand out a little Spanish and Italian when occasion requires. Does my plan pay well? I think so. I made a trip once from New York to Europe and all over it, thence to Egypt and Palestine, and to India, China, Japan and across Siberia, had every expense paid and got 1,000 guineas, which is over \$5,000, for the trip. On another trip of four months I made \$1,000 clear."

AN ANCIENT MORTGAGE.

Dates From Cleopatra's Time—Now in British Museum.

Of all the numerous Egyptian papyri dating from the Graeco-Roman period and preserved in the British Museum, none can be said to be of greater interest than those throwing light on the social conditions and manners and customs of the period. Many of these documents are mortgages, bills of sale and marriage contracts. Of the first named class a very interesting one, dated in the twentieth year of Cleopatra and Ptolemy, has recently been published by Dr. Nathaniel Reich. It appears that a shepherd, named Menthui and his mother, Ta-usir, finding themselves in difficulties, mortgaged their field to a woman named Ete, for the sum of 600 pieces of silver, which they promised to repay in eight months' time with interest. In case of failure of this condition they are willing to forfeit the field without further trouble or obligation. After giving the measurements of the land and particulars of its boundaries, the document is attested by Heru-se-esi, scribe of Usir-ur, alias Amenhotep.

Don't grasp any person who approaches you; do what he tells you. Don't attempt to get into a boat coming to your rescue; catch hold of the stern until assisted to get in.

If you follow out these directions when in distress in the water you will help yourself and others coming to your assistance.

Tread water by keeping the legs moving up and down, as in walking upstairs. Hold an oar or canoe paddle, plank or branch of a tree in the middle when thrown to you; an oar or paddle with the blade flat on the water will keep you up if you don't struggle. Take in long breaths through the mouth and inhale through the nostrils; this makes the body more buoyant and keeps you warm.

IS YOUR CHILD LAZY?

'Tis Papa's Fault, or Else Mama's, or Perhaps Both.

The utter stupidity of the passion so many parents have for demanding that their sons and daughters be always the first in school, no matter what their mental equipment or physical condition, was proved by Doctor Laumonier, a famous French practitioner, who shows that eighty per cent. of school children supposed to be lazy are victims of hereditary disease, their parents having suffered before their birth of various kinds of illness, diabetes, gout, nervous disease, etc.

"Children born under such conditions," says the doctor, "are not lazy, but ill, and instead of the punishment inflicted upon them by unthinking parents who have only their own glory at heart, they deserve every kind of consideration. They should have extra food and an extra allowance of keep these children after school hours should be educated up to the facts, and if they do not want to take notice of them should be discharged."

"Many people set their children a bad example by eating too fast. Fast eaters are attacked by that 'tired feeling' after the meal. It's the same with children. When they return to school after luncheon the troubles of their digestion will not allow them to learn, or understand. Again foolish teachers call such children lazy."

The physician has observed that children who have a very light sleep and snore are usually called lazy. Investigation showed that seventy per cent. of such children are suffering from illness of the respiratory organs. They ought to be placed under a doctor's care. Whenever a child is called lazy, it is well to inquire whether his or her respiratory organs and digestion are faultless, furthermore whether they are not suffering from hereditary diseases that ought to be eradicated.

ONLY FAIR.

Two Irishmen were one day working on a farm. Just about dinnertime they were called to dine off a large basin of broth. The farmer's wife only had one spoon to spare, so she gave Pat a fork.

Poor Pat was getting nothing, while Mike was very busy. When the basin was about a third empty, Pat said:

"Arrah, now, Mike, you dig a bit and I'll shovel."

ing inquiries after the owner. But the owner was prudent enough not to claim his property.

CAUGHT SMOKING.

The detectives once determined to make sure that no one was stowed away in the submerged torpedo-room of a certain ship. This room is at the very keel of a ship, and only to be entered by a water-tight man-hole door. So they opened the water-doors in the ship's side. Promptly there came up through the man-hole two small damp riveters who had hidden there for a quiet smoke! The penalty for smoking on board, by the way, and even for carrying matches, is instant dismissal.

Sometimes, however, there is a really serious case. While one of the newest cruisers (one of the three Invincibles) was on her trials two men boarded her at night as she lay at anchor. They were at once handed over to the police.

A day or two later, just before the great test trial, the engineer in charge thought it would be advisable to have a look at the interior of the turbines before steaming, in order to make sure that there was no rubbish that might damage the delicate turbine blades.

NIGHT AND DAY SHIFTS.

When they were opened two heavy steel chisels were found inside. If the engines had been started damage would have been done that it would have taken months to set right. Two draughtsmen, foreigners, were dismissed on suspicion. During trials, by the way, a ship is not run by Navy men, but by shipyard men.

On the same ship a fire broke out about the same time in the engine-room. Some oil fuel storage tanks had caught fire. The fire was believed to have been intentional, and six men were dismissed, two of them foreigners.

Some time ago a detective entered a gun turret on a ship that was being built at this yard, as he suspected that someone was smoking inside. He was felled at once with a hammer. The criminal was never discovered.

When the night-shift firemen take charge of a ship at night the first thing they do is to search every part of the ship from stem to stern. Not until this is done are the day-shift men allowed to leave.

When a new design is being used for a warship all the draughtsmen engaged on the work are formally sworn to secrecy. About 10,000 drawings are needed for each ship, among which are some 5,000 for the hull, 3,500 for the machinery, and 500 for the gun mountings.

The Navy's secrets are indeed well guarded.—Pearson's Weekly.

KILLS RAT AND RABBIT.

A new rat and rabbit exterminator is being tested out in India and Australia. It consists of an outer and inner metal shell, like one small egg in a larger one. In the outer shell is sulphuric acid, in the inner metal egg is dry cyanide of potash. The outer shell is filled with the acid and placed in the rat hole or burrow, and all rat holes are tightly sealed. After an hour or so the acid eats into the cyanide and turns loose a lot of most deadly prussic acid gas.

TS SOME FAMOUS UGLY MEN IN MERRY OLD ENGLAND

RD-PLAINNESS NO BAR TO SUCCESS AS WOOLERS.

men, The Ugliest Men Have Been Famous "Lady Killers" in Days Gone By.

"No woman worthy of the name," wrote one of the loveliest ladies in London society recently, "really cares a brass farthing whether the man she honors with her hand is handsome or ugly so long as he possesses the manly qualities of brains, physical strength, honor and so on which make powerful appeal to our sex."

And certainly history support this rather unconventional view, says Tit-Bits, for many of the plainest men of whom we have any record have not only won pretty and well developed brides but have been able to pick and choose among the fairest, to the confusion of their more well favored rivals.

Was there ever a plainer wooer, we wonder, than John Wilkes, the famous champion of popular liberty and one of the most dissolute rascals of his day? So ugly was Wilkes that

THE VERY CHILDREN

ran away shrieking at sight of him in the streets, and yet such was the spell he cast over women that "ladies of beauty and fashion vied with each other for his notice, while men of handsome exterior and all courtly graces looked enviously and impatiently on."

"Give me a quarter of an hour's start," he used to boast, "and I will win any lady's hand against the handsomest man in England." And he could have done it too. There were few beauties, however fair or highly placed, whose hands could not have been his for the asking, and in the very early '20s he won for his wife one of the loveliest heiresses of the time, a lady who refused more than one coronet to be his bride.

"Beauty and the Beast" they call us," Wilkes once said to a friend, "and really I cannot find fault with the description."

Brougham, the great Lord Chancellor, was a man of almost repellent ugliness, without a solitary compensating grace of speech or manner. Conscious of his unattractiveness he shunned ladies' society as he might have shunned the plague. And what was the result? The ladies, the most lovely and aristocratic in the land, simply mobbed the

"UGLY LAWYER."

and were as proud to win a smile from him as an offer of a coronet from any other man.

When any one asked, "Where is Brougham?" the invariable answer was, "Where the ladies are thickest." And, sure enough, there he was; and the more he repelled his fair persecutors, the more they clustered round him.

Another famous "lady killer" was Jean Paul Marat, one of the leading and most infamous figures in the French Revolution. "Beyond any question," wrote a contemporary, "M. Marat is the ugliest man in the whole of France—and not

To mark his gratitude for "a singularly happy fifty years of married life," Sir James Whitehead,

Cost of Operating Railways

Diagram showing how the Gross Earnings of the Canadian Railways for year ending June 30th 1909 were spent.

Comparative figures for United States Railways are shown in outer circle.

Gross Earnings \$46,036,336.

Dotted line shows the extent to which the cost of Labor would ultimately be increased, and its consequent effect on Batterments and Finances of the Railways, if the increases allowed by the Board of Conciliation to Trainmen are granted.

A prominent railway official has sent the accompanying diagrams and statement to The Star as an answer to the assertions being made regarding the share the employees should enjoy of the railroad's earnings:

"The above diagram should prove interesting to the general public, to railway managers, and employees. It should be of some help also to conscientious statesmen, who are often asked to throw the harpoon into the railroad before the latest wound has healed. It will surprise some people to learn that, according to Government reports, 43.58 per cent. of the gross earnings of Canadian railways goes to labor direct, as compared with 41 per cent. paid on the same account by American roads. This is largely due to the climatic conditions and to the lower earning power of the Canadian railways.

"Moreover, American roads, covering about the same territory as Canadian roads cover, operate through a settled country, serving 87,000,000 people, while Canadian roads have only 7,000,000 to serve.

"In addition to the 43 per cent. of gross paid for labor, 75 per cent. of the money paid on account of fuel and oil, representing 9.7 per cent. of gross earnings, goes to the men who mine coal and boil oil. This brings the amount paid to labor directly and indirectly up to 52.65 per cent. of the earnings. The cost of upkeep, material, equipment, and supplies eats up 8.83 per cent. of the gross earnings, 6.02 per cent. of which goes to the men who work with their heads and hands to produce these items and articles.

"So we find that the railway pays out close to 60 per cent. of every dollar taken in for labor.

"The fact that Canadian railways pay considerably more of each dollar on this account than is paid by their American competitors refutes the argument that American manufactures come to Canada in order to secure cheaper labor.

"Naturally our winters being longer and harder and our days shorter than the winters and days are farther south, our railways get less out of the day's work.

"Another point against our railway is that nearly every American line running east and west passes through or near some vast coal field. Canadian roads have not only to haul their coal great distances, but in addition have to pay a heavy duty on every ton of coal they import, a serious handicap.

"The tendency in Canada, as in the States for the past decade, has been raised taxes, and at the same time reduce the rates to reduce the earning power and increase the fixed charges. In the meantime during the past ten years the wages of railway employees in Canada have been increased by nearly 80 per cent.

"So all things considered Canadian railways make a splendid showing from most any viewpoint, and they unquestionably have in many respects a harder row to hoe than have the American lines, with whom for transcontinental traffic they must compete.

"Always when planning war on the railway, the railway employee has to keep in mind the benefits, accruing from pension or superannuation funds, the saving of years, which are lost to him if he severed his connections with the road. As the railways contribute largely to this fund, they very naturally insist upon an oversight of that department. In the case of a recent strike at Winnipeg one faithful old employee had but a year to serve before becoming eligible for benefits, but he was forced to walk out and lose a life pension.

Another famous "lady killer" was Jean Paul Marat, one of the leading and most infamous figures in the French Revolution. "Beyond any question," wrote a contemporary, "M. Marat is the ugliest man in the whole of France—and not merely ugly but positively repulsive in person, habits and manners."

And yet in his early years he was beyond rivalry the most popular physician in Paris. His consulting rooms were crowded daily by the loveliest women in the French capital, pushing and jostling to get a word with or perhaps win a smile from him. That he turned a deaf ear and cold shoulder to their allurements only stimulated their ardor, until their attentions became so embarrassing that at one time he seriously meditated flight.

Even when he contracted a loathsome skin disease while hiding in the sewers of Paris, he was devotedly nursed by one of the loveliest of his many admirers, whom he "married one fine day in the presence of the sun."

If possible a still more repulsive man was Potemkin, the former private soldier who enslaved the fancy of Catherine the Great and by her favor was made virtually Czar of Russia.

DREADFUL AND REPULSIVE, was the description of him by one who knew him. "He has an unwieldy figure and knockknees, is swarthy of skin, coarse in feature and has lost one eye. He often passes whole days in his room half dressed, uncumbed, unwashed, biting his nails and scratching his untidy head." And yet, says Durand, "the Empress is quite crazy over him, as is proved by her passionate letters, in which she addresses him as 'my lord,' 'my king,' 'my inestimable treasure.'"

But perhaps the most remarkable of all these cases of woman's infatuation for ugly men was that of W. Hamilton, a Scotchman, of a century and a half ago. Hamilton was not only preternaturally ugly but he was terribly deformed. "His legs," we are told, "were drawn up to his ears, his arms were twisted backward, and almost every member was out of joint."

In spite of these terrible physical drawbacks Hamilton easily outstripped all the gallants in his district in the favor of the ladies. "He might have married any of them for the asking—indeed, it is said several of them actually asked him," says a chronicler. "But he remained proof against all their wiles until after his eightieth birthday, and then he married a girl of 20, himself being carried to the altar on men's shoulders."

LARGEST WEAVING LOOM.

Germany boasts that it has the largest weaving loom in the world. An engineering firm of Chemnitz, Saxony, the centre of the textile industry, has just completed for a firm at Rodewisch, in the same neighborhood, a huge crank loom 77 feet long and 60 feet wide. It stands 10 feet high and weighs 85 tons. The shuttle is of corresponding proportions and travels to and fro fifteen times a minute. This machine is capable of turning out seamless discs of felt such as are used in paper mills up to 223 feet in circumference.

Thanksgiving services were held in St. Paul's, following our late King's recovery from illness—once while he was Prince of Wales, and, later, after the Coronation.

To mark his gratitude for "a singularly happy fifty years of married life," Sir James Whitehead, who was Lord Mayor of London in 1889, has given £3,000 to found a scholarship at the Appleby Grammar School.

The accounts for 1909 of the Transvaal War Relief Fund for disabled men show that during the last ten years 10,021 men have been assisted at a cost of £75,346 and £8,951 has been spent on cases in the colonies.

The fine old parish church of Lyme Regis, dating from the fifteenth century, is threatened by the encroachment of the sea, and an appeal is made for £2,000 for measures to secure the safety of the historic building.

Another of the Bucknall liners, the Fort Salisbury, which has recently left the Tyne, has taken a white instead of a Chinese crew, says the shipping Gazette, and the companies have recently got rid of their Chinese seamen.

The full title of King George is: "His Most Excellent Majesty George the Fifth, by the Grace of God, of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India."

An octogenarian laborer, who was complimented by the judge at the Holt (Norfolk) County Court on the neatness on which he had made out an account, stated that his daughter had taught him to read and write when he was ill a few years ago.

MYRIAD MICROBES IN FRUIT.

Should be Kept Covered and Washed Before Eating.

French scientists have been putting the microbe test to small fruits sold on the streets and in the shops of Paris. Gooseberries, bought in a respectable shop, when washed, left only 78,000 microbes in one-sixth of a cubic inch of water; the same berries bought from a street barrow populated the water in which they were washed to the extent of 851,000 microbes to the same quantity of water; and grapes bought in a shop by which automobiles pass frequently, deposited 3,650,000 microbes to this mere spoonful of water. With a second and third washing the number of unseen ones was reduced to a few thousand, so the savants think that all fruit should be washed before being eaten, and that dealers should keep their berries covered with muslin.

GAMESTERS IN ROME.

Particulars have come to light of a remarkable raid made on a gaming room connected with one of the principal hotels in Rome. A few nights ago half-a-dozen policemen entered the room while roulette was in progress and seized all the money on the tables—about \$1,000. They also took the pocket-books of the players, but made no arrests. Not until some time afterwards did the roulette players discover that they had been the victims of an audacious robbery, the "policemen" being a band of thieves in disguise.

8.32 per cent. of the gross earnings, 6.02 per cent. of which goes to the men who work with their heads and hands to produce these items and articles. "So we find that the railway pays out close to 60 per cent. of every dollar taken in for labor.

Happenings in the Emerald Isle of Interest to Irishmen.

A cattle drive is reported to have taken place in the Milford district of Donegal.

Twenty-one pike were caught in one day in the Killeshandra district during a recent week.

The number of animals exported from Waterford during the week ending the 21st ult was 2,491.

Recently twenty-seven persons left Skibbereen for America. All were young unmarried men and women.

The Ballyshannon Feis will be held on Sunday, July 10. The competitions will be open to Donegal, Fermanagh, Leitrim and Tyrone.

About fifty head of cattle were driven from lands at Augharush, near Askeaton, but some of the animals have been recovered.

A familiar figure has passed to his reward in the person of Mr. John Fitzgerald, of Cork, "the Bard of the Lee." He was a remarkable personality in many ways.

Ireland derives a revenue of nearly £500,000 a year from foxhunting. She has managed to get nearly four times as much as that in the form of old age pensions, however.

Cork County Council has delegated to a committee consisting of six of its members and five non-members the powers vested in it for the preservation of ancient monuments.

The Cork Poor Law Union's total expenditure for the half-year ended 30th September last was £138,550. The general total of all persons relieved during the half-year was 11,667.

The death is announced in Brisbane of Mrs. O'Doherty, who gained fame by her contributions under the pseudonym of "Eva" to "The Nation," the organ of the Young Ireland movement.

Ormond Quay church, Dublin, has lost an old member by the death of Mr. Robert Paul, J.P., at the age of 85. Mr. Paul has resided in Dublin for 65 years, and was the trusted friend of six ministers there in succession.

Belfast is fortunate in the possession of fine botanic gardens, situated in the Botanic Gardens Park, University road. The park covers a space of 17 acres, and is a popular resort of the citizens as well as of the excursionists who visit the city.

ally insist upon an oversight of that department. In the case of a recent strike at Winnipeg one faithful old employe had but a year to serve before becoming eligible for benefits, but he was forced to walk out and lose a life pension.

Thousands of people assembled at Nenagh, County Tipperary, to witness the funeral of the brothers McCormack, who were hanged there 52 years ago for a crime of which they were innocent. The remains were transferred from the grounds of the gaol to Loughmore Cemetery.

THE LEPERS AT MOLOKAI.

Escape From the Settlement Practically Impossible.

No greater misconception of any public institution prevails to-day than the general idea of the leper settlement on the island of Molokai, says a writer in Harper's Weekly. Instead of the entire island being used for such purpose the settlement comprises only eight square miles of a total area of 261 square miles.

It occupies a tongue of land on the northern side of Molokai. The north, east and west shores of this tiny spit are washed by the Pacific, while on the south side rise precipitous cliffs of from 1,800 to 4,000 feet, which make the isolation seem even more hopeless than the beautiful deep blue waters of the sea ever could. The most difficult and dangerous trail, constantly manned by Government guards, foils escape, if it were ever contemplated by the land side.

Naturally the fear of being isolated at the settlement caused the natives to thwart segregation. Generally it was done by secreting their afflicted, yet there are instances of lepers using violence to resist arrest. The necessity of severing ties of the strongest affection involved grief of the deepest description, and many are the cases of abnegation where the clean have accompanied the afflicted to the settlement to die there with them.

Then, too, by degrees there grew up the belief among the natives that terrible mistakes of diagnosis by the physicians were consigning innocent and helpless people to the living sepulchre. And as each year failed to eradicate the disease as had been represented, but still claimed its toll, the belief became almost universal that a larger proportion of these committed were sacrifices to the despotism and ignorance of the white man's medical science that boasted but could not cure.

By degrees, as the Government realized the inability of the afflicted to care for themselves, conditions were improved, until finally the authorities took entire charge of the lepers, and to-day the appropriations for the maintenance and care of these wards are most generous, and exceed \$125,000 annually.

THE DROUGHT DOES HARM

Premier of Manitoba Speaks in a Most Pessimistic Style.

A despatch from Winnipeg says: In an interview with Premier Roblin, who has had thirty years' experience in farming and in the grain business, and who has covered many parts of the Province in the past week in his election tour, he expressed his views on the crop situation in Manitoba. He declares that even with the most favorable conditions from now on Manitoba cannot possibly harvest more than half a crop in 1910, and, he adds, that another week of heat without rain will mean practically no crop at all.

The same story was told by one of the biggest wheat operators of Chicago and Minneapolis, who spent a week in the Province satisfying himself at first hand as to the prospects.

The G. T. P. issued, on Wednesday, afternoon, a crop report showing that for 120 miles west of Winnipeg the wheat is in bad shape, in some places being burned red. West of Biggar conditions are more favorable throughout northern and

central Saskatchewan, where local showers have been more or less frequent and the heat is not so great. Southern Manitoba is to date the greatest sufferer, and in many districts the farmers have practically given up hope of saving anything.

A special crop report issued on Wednesday by The Winnipeg Free Press says:—"The hot, dry weather which has existed for the last ten days has at last awakened the public to the fact that the general condition of the crops is anything but booming. The consensus of opinion seems to be that the crops to the south of the C. P. R. main line in both Manitoba and Saskatchewan are considerably damaged. North of the C. P. R. main line there are sections which have been seriously damaged, but on the whole the crops appear to be in a pretty fair condition."

Mr. McKay, Superintendent of the Experimental Farm at Indian Head, claims that the crops in that locality never before looked better at this time of the year.

GOULTHRITHE'S BODY FOUND

Superintendent of the Dominion Printing Bureau Committed Suicide.

A despatch from Detroit, Mich., says: The body of Frank S. Gouldthrite, late superintendent of the Dominion Printing Bureau, was found on Sunday floating in the river by a fisherman, near Trenton, Mich., a little village a few miles south of Detroit. This puts an end to the theory that Gouldthrite had hoaxed the police by walking off the big Detroit and Buffalo passenger steamer Eastern States, leaving his coat and hat and a note to the effect that he had committed suicide.

The finding of his body on Sunday was a surprise to the Detroit police, who did not believe that he had committed suicide. Gouldthrite evidently jumped off the Eastern States a few miles below Detroit. His shirt and collar were covered with blood, indicating that he had also tried to cut his throat before throwing himself overboard. His body has been identified by local police officers, and is held here awaiting instructions from the Ottawa police.

YOUNG FOLKS

LITTLE JEWELERS.

They were playing jewelry store, Edith and Corinne, when Mrs. Barr called from the back door. Edith ran up at once.

"Haden't you better invite Mrs. Mill's granddaughter over to play with you?" mamma asked.

Edith scowled. "We don't either of us know her," she objected.

"It won't take long to get acquainted. She looks lonesome."

"Well," yielded Edith, but she did not say it cheerfully.

The two little girls talked together in whispers for a minute;

white and pink cotton, were the articles she had made. The blossoms of scarlet sage strung together looked almost like a coral necklace, red rose hips made a pretty bracelet, yellow baby roses, put together with wire, answered for pins and belt buckles, while fuchsias were pretty earrings.

"Nobody will want to buy ours after seeing yours," mourned Corinne.

"Oh, I think they will!" returned Laura. "But why not put them all together? I'd rather."

"Would you, really?" asked Corinne, her face growing hot, as she remembered that she had been the one to suggest separate "stores."

So more shallow boxes were obtained, and the whole stock was taken in readiness for the real play to begin. Business was brisk, and Laura soon had to leave her place behind the counter in order to fetch

STOMACH MISERY

BANISHED BY "FRUIT-A-TIVES"

MR. ALCIDÉ HEBERT

Stratford Centre, Wolfe Co., Que.

"I have been completely cured of a frightful condition of my Stomach through the wonderful fruit medicine 'Fruit-a-tives'. I could not eat anything but what I suffered awful pain from indigestion.

My head ached incessantly.

I was told to try 'Fruit-a-tives' and sent for six boxes. Now I am entirely well, can eat any ordinary food and never have a headache."

ALCIDÉ HEBERT.

50c. a box, 6 for \$2.50, or trial box, 25c. At all dealers or from Fruit-a-tives Limited, Ottawa.

THE WORLD'S MARKETS

REPORTS FROM THE LEADING TRADE CENTRES.

Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

BREADSTUFFS.

Toronto, July 5.—Ontario wheat—No. 2 winter, 94c to 95c outside. Manitoba Wheat—No. 1 northern, \$1.07; No. 2 northern, \$1.05; No. 3 northern, \$1.03 at lake ports for immediate shipment.

Corn—American No. 2 yellow, 68c; No. 2 yellow, 67½c; Canadian corn, 62c to 63c, Toronto freights. Oats—Canada western, No. 2, 28c; No. 3, C. W., 37c at lake ports for immediate shipment; Ontario No. 2 white, 33c to 34c outside; No. 3 white, 32c to 33c outside, 36½c on track Toronto.

Barley—No. 2, 51c to 52c; No. 3 extra, 49c to 50c; No. 3, 46c to 47c outside; Manitoba, No. 4, 49c on track, lake ports.

Peas—No. 3, 70c to 71c.

Rye—No. 2, 67c to 68c.

Buckwheat—No. 2, 51c.

Manitoba Flour—Quotations at Toronto are:—First patents, \$5.40, second patents, \$4.90; strong bakers', \$4.70; 90 per cent., Glasgow freights, 25s.

Ontario Flour—Winter wheat patents for export, \$3.50 to \$3.60, in buyers' bags, outside.

Millfeed—Manitoba bran, \$18 per ton; shorts, \$20 per ton, track, Toronto. Ontario bran, \$19 per ton; shorts, \$21 per ton on track, Toronto.

COUNTRY PRODUCE.

Eggs—19c to 19½c per dozen in case lots.

Butter—Creamery prints, 23c to 24c; separator prints, 20c to 21c; dairy prints, choice, 19c to 20c; dairy tubs, 17c to 18c; inferior tubs, 16c.

Cheese—11½c for large and 11¼c for twins. Old cheese, 12½c to 13c.

Fashion Hints.

SEEN IN PARIS SHOPS.

Paisley effects are much in vogue. Poplin for suits is quite in evidence.

Crushed suede or satin belts are much worn.

One sees comparatively few Russian blouse costumes.

Rep is a material much used this summer for separate skirts.

Handbags of black satin with monograms and mountings of gold are used.

There is yet no limit to the amount of braiding put on gowns and suits.

Deep cotton fringe trims the bottom of some of the coats of the moment.

Smocking is seen on some of the handsome lingerie negliges of soft silk.

Silk and lisle stockings are worked with rooster heads on instep and ankle.

The serge of fine twill is as firmly established as ever for simple dresses.

Monogram bags of linen with clasps of gold or silver are embroidered to match the frock.

Cute little children's bonnets are of shirred cretonne, while others are a combination of straw and cretonne.

Among the handsome scarfs which the season has brought forth are some of crepe with hand painted borders.

The newest thing in auto veils is a washable dustproof silk of a fine, canvaslike mesh, but of a soft texture.

The scarf often develops into a deep point at the back, with a reminiscence of the shawl of the second empire.

Fashion has decreed that one's parasol and stockings must match the gown. The choice of the shoes is left to the wearer's own taste.

A point to remember is that the sleeve of a lingerie frock looks much more graceful if put into the arm's eye with a narrow beading.

Blouses of coarse fishnet in black or colors, with embroidered applications in varied cashmere coloring, look well with almost any toilet.

Smart are the "co-ed" sweaters with white and blue collars; they fasten on the shoulder and under the arm with white or pearl buttons.

For a coat costume of linen nothing is prettier than a simple shirt waist of cotton voile pinched with white and the color of the suit.

The new corset is a good deal lower in the bust than was the case last year. Its waist is still long and its hips are narrow, straight, and long.

IS THINNESS EMBARRASSING?

Undoubtedly It is to Many a Maiden and Youth—While Even Those Well Along in Years Prefer Well Rounded Figures.

Prescription Increases Weight.

"It won't take long to get acquainted. She looks lonesome."

"Well," yielded Edith, but she did not say it cheerfully.

The two little girls talked together in whispers for a minute; then Edith slowly crawled through the place in the fence where the pickets were off, and walked toward the little girl in the big, old-fashioned garden.

"Would you like to come and play with us?" she asked. "We're going to have a jewelry store; we're making the jewelry now."

"Oh, thank you! I'd love to!" cried the other. "I'll run right and ask grandma. You will have to teach me how to play it; I never did," she said, as she walked along by Edith's side.

"Oh, we're stringing snowberries for pearl necklaces and making pins out of asters, and doing things like that. When we get enough we'll ask the other children to come and buy."

"It must be fun!" and Laura Mill's face glowed with pleasure.

The bench, which was now a counter for the display of jewelry, showed several necklaces.

"How pretty!" cried Laura. "Oh I know what I'll make!" and she ran back into her grandmother's garden.

"I don't think that's very polite—to go off first thing!" fretted Edith, as the visitor did not return.

"Let's tell her she can have a store by herself," suggested Corinne. "Probably she won't make anything nice."

So Edith called through the fence: "If you want to you can have your things on your side!"

"All right!" came back to them from behind the flower-beds; but it did not have a joyful sound.

For a long time the three worked quietly. Finally Edith and Corinne were ready for customers. "We'll have to go and tell her," whispered Edith.

Together they approached the fence.

"Oh, what a lot!" gasped Corinne.

"Why, it's just like a real jewelry store!" cried Edith.

"Aren't they pretty?" said Laura, smiling.

There was a large wooden box close by the "gate," and upon it, in small paper boxes, lying on

the one to suggest separate

"stores."

So more shallow boxes were obtained, and the whole stock was soon in readiness for the real play to begin. Business was brisk, and Laura soon had to leave her place behind the counter in order to fashion more jewelry.

By dinner-time all the children were wearing the pretty ornaments, and both Corinne and Edith thought there could not be a pleasanter playmate than Laura Mills.—*Youth's Companion.*

NO OUTLET FOR WHEAT.

A Serious Situation is Created at Montreal.

A despatch from Montreal says: There is a wheat blockade here, and grain is steadily flowing from the west. The elevators here are full, and there is little export, so that the situation is serious for the grain-carriers of the lakes. There are ten now lying at the elevator, with no space to unload, and some have been there for almost a week. Each day means a loss of about \$200 and more carriers are arriving daily. The reason of the block is that the buyers for export are about 10 cents off the Canadian price, and so there is practically no export wheat. The commissioner's elevator has a million bushels and cannot get rid of it. Mr. James Carruthers says that it looks as if Europe did not want a bushel of wheat from Canada, and the grain men of Canada would have to get together and devise some way out of the difficulty.

MR. VICKER'S MISSION.

Conferences With Leading Financial and Shipping Men.

A despatch from Montreal says: Mr. Albert Vickers, President of the world-famous British firm of Vickers' Sons & Maxim, is in Montreal, and has had a number of conferences with leading financial and shipping men, and also with President G. W. Stephens and Mr. C. C. Ballantyne of the Harbor Commission, in regard to the financial aspect of the huge undertaking his firm is to engage in in the building of a five million dollar floating dock and shipbuilding plant in Montreal.

DRY DOCKS TO BE BUILT

Plans Have Been Approved For Sault Ste. Marie and Vancouver.

A despatch from Ottawa says: Plans for two large drydocks have been approved by the Government. One is to be built at Sault Ste. Marie, and the other at Vancouver. The Sault dock is to be seven hundred feet long and cost nine hundred thousand dollars. It will accommodate the largest craft on the great lakes, a number of which are over six hundred feet long. The Government will pay on this dock a subsidy of three per cent. for twenty years on the cost. The Vancouver dock is to be one of the second-class, and on it the Govern-

ment has agreed to pay a subsidy of three and one-half per cent. for twenty-five years on the cost up to \$1,200,000. This is to be a floating dock, with a lifting capacity of fifteen thousand tons, and is, therefore, capable of handling the largest craft sailing to Canada at the present time. The company contemplate the operation of a car construction plant in conjunction with its drydock and shipbuilding and repairing industry. The car works will involve an additional outlay of half a million dollars. There will be no subsidy upon this.

Butter—Creamery prints, 23c to 24c; separator prints, 20c to 21c; dairy prints, choice, 19c to 20c; dairy tubs, 17c to 18c; inferior tubs, 16c.

Cheese—11½c for large and 11½c for twins. Old cheese, 12½c to 12¾c.

Beans—\$2 to \$2.10 per bushel for primes and \$2.10 to \$2.20 for hand-picked.

Potatoes—Ontario potatoes, 55c to 60c per bag out of store; new American potatoes, \$2.75 to \$3 per barrel.

PROVISIONS.

Wholesale quotations:—

Lard—Firm; tierces, 16c; tubs, 16½c; pails, 16½c; stocks very light.

Smoked and Dry Salted Meats—Long clear bacon, tons and cases, 15½c to 15¾c; backs (plain), 21c to 21½c; backs (pea-meal), 21½c to 22c; shoulder hams, 14c to 14½c; green meats out of pickle, 1c less than smoked.

Rolls, smoked, 15c to 15½c; medium and light hams, 18c to 18½c; heavy, 16½c to 17c; bacon, 19c to 20c.

MONTREAL MARKETS.

Montreal, July 5.—Flour—Manitoba spring wheat patents, firsts, \$7.50; seconds, \$5; winter wheat patents, \$5; Manitoba strong bakers', \$4.80; straight rollers, \$4.50 to \$4.75; in bags, \$2.10 to \$2.15; extras, \$1.90 to \$2.

Oats—7c bushel higher.

Corn—American No. 2 yellow, 64c to 65c; American No. 3 yellow, 63c to 64c.

Oats—No. 2 Can. western, 38c to 38½c; No. 3, 37c to 37½c.

Barley—No. 3, 48c to 48½c; No. 4, 44c to 45c.

Millfeed—Ontario bran, \$18.50 to \$19; do., middlings, \$21 to \$22; Manitoba bran, \$18; do., shorts, \$21; pure grain mouillie, \$32 to \$33; mixed mouillie, \$25 to \$28, car lots.

Butter—Best creamery, 22c; creamery, 21½c.

Cheese—western, 11c to 11½c; eastern, 10½c to 10¾c.

Eggs—Selected stock, 21c per dozen.

UNITED STATES MARKETS.

Minneapolis, July 5.—Wheat—July, \$1.12½; Sept., \$1.08½; Dec., \$1.07½; cash, No. 1 hard, \$1.17; No. 1 Northern, \$1.15 to \$1.16½; No. 2 Northern, \$1.13 to \$1.14½; No. 3 Northern, \$1.10 to \$1.11½. Bran—\$17.50. Flour—First patents, \$5.30 to \$5.50; second patents, \$5.10 to \$5.30; first clears, \$4.15 to \$4.25; second clears, \$2.90 to \$3.20.

Milwaukee, July 5.—Wheat—No. 1 Northern, \$1.15 to \$1.16; No. 2 Northern, \$1.13 to \$1.14; Sept., \$1.11; Rye—No. 1, 77c. Corn—Sept., 60½c. Barley—No. 2, 67c.

LIVE STOCK MARKET.

Montreal, July 5.—There was only one lot of really prime beefs on the market, and these sold at about 7c per lb. A few of the others sold at about 6½c per pound, and from that down to 5½c for pretty good animals, while the common stock sold at from 3½c to 5½c per lb. Milch cows from \$30 to \$65 each. Calves from \$3 to \$15 each. Sheep about 4c per lb. Lambs at about \$4.50 each, or 9c per lb. Good lots of hogs sold at 9½c to 9¾c per lb.

Undoubtedly it is to Many a Maiden and Youth—While Even Those Well Along in Years Prefer Well Rounded Figures.

Prescription Increases Weight.

A scrawny, gangling youth or maiden is almost invariably slighted, overlooked or ridiculed in any social gathering. There is something about a plump or well proportioned figure which attracts not only friendship, but love and adulation as well.

People with a proper amount of flesh are favored in all walks of life, while the thin are unblesed, unwelcome and frequently miserable for life. The difference lies in the power of the digestive functions and the ability of the blood and nerves to absorb and distribute over the body the nutrition extracted from the food eaten.

The thin person is abnormal and lacks the power to absorb and retain the flesh and fat elements which the gastric juices in the stomach and intestines should extract or separate from all kinds of food and drink.

A recent accidental discovery has proven that tincture cadomene when blended with certain other drugs, will add from one to three pounds of flesh per week during treatment, while the general health and strength also improves wonderfully.

Get in a half pint bottle, three ounces of essence of pepsin and three ounces of syrup of rhubarb; then add one ounce compound essence cardiol; shake and let stand two hours; then add one ounce tincture cadomene compound (not cardamon). Shake well and take a teaspoonful before and after meals, drinking plenty of water between meals and when retiring.

"MILES OF GOLD."

Britain Excited Over Finds in British Columbia.

A despatch from London says: The discovery of gold in northern British Columbia has caused considerable excitement here. The headlines in the press comprise "Miles of Gold," "A British Eldorado of Fabulous Wealth," and "Mammoth Reefs." The Agent-General for British Columbia has had hundreds of inquiries, to whom he states that he has no official confirmation of the reported discovery, but a rush from London has already started.

BLOWN TO ATOMS.

Store of Dynamite Exploded Near Nepigon.

A despatch from Port Arthur says: Two foreigners named Carlson and Olison, while working on the transcontinental about Nepigon were blown to atoms by the explosion of dynamite used in blasting for a roadbed. They were working near where the explosive was stored, when suddenly there was a terrific explosion, and the men were blown to atoms. Olison was blown over 100 yards in the air. He was well known in Nepigon. How the dynamite came to explode will never be known, but it is thought that the intense heat and the heaviness of the air had some effect on the explosive.

STUDENTS WITH REVOLVERS.

Hundreds Involved in Clash in Hungary.

A despatch from Lemberg, Austria-Hungary, says: Two groups of Ruthenian and Polish students of the University of Lemberg got to each other on Friday and before the police had separated the combatants many of the students had been seriously injured.

The feud, borne of racial jealousy is as old as the university itself and periodical clashes have occurred. For some time the bitter feeling has been held in bounds by the university authorities, but it broke out in pronounced fury and led to a fierce battle for the possession of the campus.

Hundreds of students were involved. Many of them had revolvers and these were used. When the firing began a strong force of policemen was summoned and the fight became a three-cornered affair. The officers finally succeeded in driving the students to cover. Broken heads were the rule, but in numerous instances injuries of a grave nature were found to have been inflicted.

GUNNER LOST ARM AND EYE.

Was Firing Sunset Gun at Royal Canadian Yacht Club.

A despatch from Toronto says: While attempting to load a small cannon preparatory to firing the sunset gun, Elmer Smith, 18 years of age, was seriously injured at the Royal Canadian Yacht Club, at Centre Island, on Saturday. He was taken to St. Michael's Hospital, where his right arm was amputated below the elbow. He was badly wounded about the head and the sight of one eye was destroyed.

Smith had been employed at the yacht club only for a short time, but had fired the gun at sunset on four successive days without accident. On Saturday, according to one report, the blank cartridge used in the cannon jammed in such a way that the breech would not lock. Smith thereupon attempted, it is said, to drive the charge into its place with a second cartridge, which exploded in his hands.

MAKE TRIP IN A DAY.

Route Into Porcupine Has Been Misrepresented.

A despatch from Toronto says: P. H. Heimer, M.E., who has spent a week in the Porcupine camp, with a view to purchasing claims, says: "Considering the age of the camp, I believe that it has a very bright future before it. Things are rather quiet at present, but indications are that there will be considerable activity within a month or so. The bugbear of the camp at present is the inexcusable lack of transportation facilities. However, the conditions with regard to the accessibility of the camp have been greatly misrepresented and it is a very easy trip for one to make Porcupine from the steel in one day."

BOY DIED OF LOCKJAW.

Lost Life Through Small Wound in the Ear.

TO DEFEND THEIR HOMES.

Whole People Should be Trained to Arms, Says Lord Roberts.

A despatch from London says: Lord Roberts, presiding at the National Service League, said they must persevere in educating public opinion to the fact that they would not have to guard the Em-

PUSHING A POPULAR LINE.

A number of commercial men were sitting in an hotel, when one of them began to boast that his firm had the largest number of people pushing its goods.

There was a little argument, and then a commercial traveller, who had not had much to say before, suddenly rose and said, "I'll bet any man in the house that my firm has the biggest number of people pushing its goods."

"Done!" exclaimed the boastful one. The money was accordingly put up with a stakeholder, and the boasting commercial traveller asked, "Now, what is your firm's line of goods?"

"Baby carriages," murmured the quiet man, as he took the money and made for the side door.

GREATEST OF VESSELS.

The New Cunarders are to be of 60,000 Tons.

A despatch from London says: With the news that the Mersey Dock and Harbor Board has decided to commence the construction of a huge dock comes the important announcement that the Cunard Company propose to build liners of 60,000 tons each. The new dock will be large enough to accommodate these vessels. The quay berths will be suitable for liners 1,000 feet in length. There will be deep-water entrances so as to avoid delay in docking. The work, which is to be carried out by contract, will be commenced in a few weeks and it is expected to be finished in three years.

Canadian Appreciation

Langham Hotel, London.

Gentlemen,—I wish to express my appreciation of the 38 h.p. Daimler which you have delivered to me. Before shipping the car to Canada I made a three weeks' trial of it, covering some 1,200 miles. The car ran perfectly, and I never had the slightest trouble of any kind, and I think it quite lives up to the many claims you make for it. The silence, smoothness of running, and power of acceleration on-hills is really remarkable.

My petrol consumption was 16 miles to the gallon, including a great deal of driving in traffic. The tyres show no appreciable signs of wear, and I think it will prove light on tyres.

I am really delighted with the car.—Yours sincerely,

(Signed) C. A. BOONE, of Toronto, Canada.

"The Most Successful Car of the Year 1909"

The Daimler Motor Co., (1904) Limited, COVENTRY, ENGLAND.

Why Have an Overheated Kitchen in Summer?

When the sultry days come and the coal range makes the kitchen almost unbearable and cooking a dreaded task, put out the range fire and try the

BOY DIED OF LOCKJAW.

Lost Life Through Small Wound in the Ear.

A despatch from Toronto says: Lockjaw, originating in a small wound in the ear caused the death of Harry Jones, aged 7 years, at Mimico, on Friday afternoon. The boy, who lived at 214 Howland avenue, was pushed from a fence at Huron street school by a play-fellow on June 21. A small twig pierced the lobe of one ear. The injury was not considered dangerous, however, and he went to Mimico with his parents. On Thursday last lockjaw developed, and he died in spite of the efforts of Dr. Forbes Godfrey, of Mimico, and Dr. Clarke, of Toronto.

QUARREL OVER A GIRL.

A Fatal Brawl at a Morning Dance in New Brunswick.

A despatch from Moncton, says: News received from Coverdale, Albert county, tells of a fatal brawl there at a dance on Friday morning. James Power, aged 23, an Intercolonial Railway employee, is dead, and Thomas Connolly, an Intercolonial fireman, has given himself up to the police. One witness says there was trouble over a girl; that Power had gone to the verandah of the house and Connolly followed him, this witness says, striking him several times on the head and neck. He fell and was carried into the house, where he died twenty minutes later, without making any statement.

POISONED BY A SNAKE.

Little London Boy Played With Dead Reptile.

A despatch from London, Ont., says: The little son of Mr. and Mrs. Turner, Princess avenue, was poisoned on Wednesday in a peculiar manner. The boy, who is about six years old, while playing out of doors picked up a dead snake, and after handling it rubbed his hands across his face. Almost at once the boy's face became inflamed and began to swell. Dr. Naven, who was called in, could not determine at once how seriously the lad was affected. He believed the reptile had been dead for some time and was partially decayed. The little fellow is in a serious condition, but is expected to pull through.

FIRES GROWING WORSE.

No Rain in a Month in Fort William District.

A despatch from Fort William, Ont., says: Forest fires are threatening the towns in this vicinity, and Fort William is clouded with smoke, it being necessary to turn on the street lights Thursday morning. The fires are getting worse at Silver Mountain, 20 miles out. Scores of men, women and children fought the flames all night and could not put them out. The fire is near Mackie and Taylor's camps and making great headway towards Silver Mountain, which is inhabited by 200 people. Mackie and Taylor intended making a raft to load the horses and camping outfit if they cannot extinguish the fire. People are getting nervous. There has been no rain for four weeks and everything is as dry as tinder.

ARMY PEOPLE CHARGE ON TRAIN TO Arms, Says Lord Roberts.

A despatch from London says: Lord Roberts, presiding at the National Service League, said they must persevere in educating public opinion to the fact that they could not hope to guard the Empire unless the defence of the country was made to depend upon the whole people being trained in time of peace to defend their hearths and homes, if their country were attacked.

A SCHOOLHOUSE WRECKED.

Carried Over Fence Into a Grain-field at Weyburn, Sask.

A despatch from Weyburn, Sask., says: Reports of the damage by the big storm in this district continue to filter in. At Weyburn Plains, a schoolhouse was lifted bodily and carried over a fence twenty rods in to a grain field, where it was piled up in a grand wreck.

ANOTHER FARMER KILLED.

Horses Were Frightened at a Passing Automobile.

A despatch from Kingston, Ont., says: Charles Dunwoodie, who lived about a mile west of Napanee, was loading hay in the field when the horses became frightened at a passing automobile and ran away, throwing Mr. Dunwoodie from the load. He was injured so badly that he died a few hours later. He was about 65 years of age, and unmarried.

Why Have an Overheated Kitchen in Summer?

Kitchen in Summer?

When the sultry days come and the coal range makes the kitchen almost unbearable and cooking a dreaded task, put out the range fire and try the newest method of cooking in hot weather—use a

New Perfection Oil Cook-stove

What a contrast! The kitchen no longer is stifling hot, the work is now done with comfort, and the housewife is not worn out with the heat.

Cautionary Note:—Be sure you get this stove—see that the name-plate reads "New Perfection."

She saves her strength, keeps her health and is better able to enjoy the summer.

The New Perfection does everything that any other stove can do—all the family cooking, baking, washing and ironing. No smoke, no dust, no odor. Heat is applied directly and not wasted. A turn, and the flame is out.

The New Perfection stove has a Cabinet Top with shelf for keeping plates and food hot, drop shelves for the coffee pot or saucepans, and nicked towel racks.

It has long turquoise-blue enamel chimneys. The nickel finish, with the bright blue of the chimneys, makes the stove very attractive and invites cleanliness. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

Every dealer everywhere; if not at yours, write for Descriptive Circular to the nearest agency of the

The Queen City Oil Company, Limited, Toronto.

FAIRBANKS-MORSE

GASOLINE ENGINES

The Only Power for Your Farm

Horizontal Evaporator Tank Engine. Mounted on Skids. Sizes 2, 4 and 6 Horse Power.

For General Farm Power

Our farm engines have all the principal features of the well-known Fairbanks-Morse Gas Engines, and are made in Vertical or Horizontal types to meet the various requirements of the farmer. Their simplicity means long life and satisfactory service.

SPECIAL TERMS TO FARMERS

Fairbanks-Morse factories produce the largest line of internal combustion engines in the world. Hundreds of men in the engineering and experimental departments are employed on all problems connected with Gas Engines. There is no company in the world that has spent as much money as the Fairbanks-Morse Co. on experimental and development work. The name Fairbanks-Morse is synonymous with Gas Engine Perfection.

1910

is half gone, and now as we are starting the last half of the year we are glad to be able to say that we are well satisfied with our spring trade. In fact we did more business in June than in any previous month in the history of the firm. We have been very busy in all departments particularly in our PLUMBING and TINSMITH Departments.

Our aim is to make 1910 a banner year, and with that end in view we have secured for our fall trade the finest line of stoves and ranges that has ever been shown in Eastern Ontario.

The Heckla Furnace

which we handle exclusively stands in a class by itself as an easily operated economical hot air furnace, and we will guarantee the installation to be done by competent workmen.

If you are thinking of putting in a furnace this fall we will be pleased to submit you an estimate.

M. C. MARBLE

To My Patrons

GREETING—

As the Seed Season is nearing its close, please accept my sincere thanks for your liberal patronage, and allow me to suggest that as July 1st is practically the end, all seed accounts may be squared away by that date.

Yours respectfully,
Thos. Symington.

BOYLE & SON'S.

Fifth Son, Winner of Long Service Medal.

A record unique in Canadian militia is that of Mr. C. W. Timmerman, of the telegraph service of the C. P. R., who recently received a long service medal. He is the fifth son in the Timmerman family to be so honored. Mr. Timmerman was a bugler with the 47th Regiment Infantry of Ontario, he being attached to the Odessa (near Kingston) company. That was in the days of the Fenian raid. Since then he has filled different regimental capacities. Mr. Timmerman's father, the pioneer postmaster of Odessa, was the man who first suggested the present-day mail bag system of distribution of mail from the express trains. His suggestion was carried out by the Government.

Barn Burned.

On Tuesday morning about 10 o'clock fire was discovered in the large barn on Mr. Jas. Blute's farm, South Napanee and in a few minutes the fine barn was ablaze from end to end and was totally consumed. About seventy five tons of hay, 200 bushels of oats, a fine bull and a quantity of farm machinery in the barn were burned. Willing hands carried water to wet the roof of the drive house and by this means it was saved from destruction. The Napanee fire engine was taken to Light's dock and a line of hose laid across the river and over to the barn to put out the fire in the mass of burning hay. Mr. Blute's loss will be heavy as he had but one thousand dollars insur-

The Napanee contingent of the 5th field battery returned from Petawawa on Monday.

The Citizen's Band will play in the Harvey Warner park this Friday evening at 8 p. m.

The Haag Circus drew good crowds both afternoon and evening when here on Thursday last.

The annual excursion of Trinity Church to Thousand Islands and Alexander Bay will be held August 3rd. Full particulars will be given later.

During June, July and August Mr. E. F. Miller will be in his office on Saturdays only. Parties having business with him will kindly arrange accordingly.

The Steamer Salaberry will be on her regular runs from Prinyers Cove to Napanee and intermediate ports on Tuesdays and Saturdays only during July and August.

Continuous afternoon trips from Napanee to Picton and return, leaving by Str. Salaberry at 1.30 p. m. daily and returning by Str. Reindeer same day arriving in Napanee 6.30 p. m. in parties of 5 to 10 passengers 50c each, 10 and over 35c each.

There is considerable talk in Deseronto of the Deseronto Iron Smelting company removing its business to Kingston and taking part of the city's smelter site. This company receives its ore from Lake Superior, the Calvin company's steamers bringing a great deal of it down during the season of navigation.

John McDonald, who claims Sarnia as his home, visited Napanee on Tuesday and in his perambulations picked up a suit case, the property of Mrs. Cousins, and left for Kingston. A description was wired to Kingston and he was soon in captivity. Chief Graham brought him to Napanee on Wednesday morning and the Magistrate sent him up for two months.

Robert John Belcher, an employee of Mr. M. S. Madole's plumbing dept., died very suddenly on Sunday last after an illness of but a couple of days. Deceased had been complaining of not feeling very well for some weeks but did not suppose he had anything seriously the matter with him. He was at work as usual up to Friday last. Deceased was aged 17 years, 10 months and leaves a widowed mother and one brother to mourn his sudden death. The funeral took place on Tuesday from his mother's residence and interment at Riverside cemetery.

Children Cry FOR FLETCHER'S CASTORIA

chinery in the barn were burned. Willing hands carried water to wet the roof of the drive house and by this means it was saved from destruction. The Napanee fire engine was taken to Light's dock and a line of hose laid across the river and over to the barn to put out the fire in the mass of burning hay. Mr. Blute's loss will be heavy as he had but one thousand dollars insurance on the barn and seven hundred on the contents.

The Royal Shoe Store business, formerly managed by S. G. Hawley, has been taken over by W. D. Dick, of Kingston. A special sale of all summer goods is now going on. Call in and see what they are offering.

Dominion Day Races.

The races at the Driving Park on Friday last drew a splendid crowd and proved very interesting. The various steamers all brought in full excursion parties and a large number of people came by rail. The Picton Band discoursed sweet music in the grand stand during the afternoon. The Baseball match between Picton and Bloomfield teams resulted in a win for the Picton team by 9 to 6 runs and an inning to spare. The horse races were well contested and some lively heats resulted. Mr. Wm. Moffat, Picton, was starter. Following is the result:

The G. I. Ham Case.

In a ruling handed down by Judge Rodriguex Mirmamon of the seventh court of instruction, in the civil part of the suit of Thomas Quirk to recover securities alleged to have been illegally disposed of by George I. Ham, president of the United States Banking company, an entire new precedent, if not overruled later by the higher courts, has been established.

The ruling declares that Thos. Quirk cannot recover the securities from the present holders, whatever the final outcome of the criminal part of the suit against Mr. Ham may be.

The text of the ruling and the arguments given therefor fill about 75 typewritten pages of legal cap.

It appears that among other securities held by the United States Banking company and claimed by Thos. Quirk were 1,020 shares of stock in the Banco Internacional Apotecario de Mexico. 1000 of which Mr. Ham alleges were transferred to him in exchange for 1,200 shares in the United States Banking company. There were also many other shares in various banks and commercial concerns held by the Bank for Thos. Quirk. It appears that these were disposed of at the National Bank of Mexico, which in turn disposed of them at some other bank, they finally coming into the possession of the Banco de Mexico y Paris which sent them to their Paris house. Mr. Quirk, through his attorney M. Luis Sietzer, has sought to obtain a court order to recover the original shares, valued by Mr. Quirk at something over \$200,000.

The court rules that if Mr. Quirk demands the return of those specific shares, Mr. Ham will have to go into the market and purchase them for him as he would in the case of so many bank bills.

The ruling caused a flurry of interest in Belem and Calle de Cordobanes court circles, as formerly commercial paper, shares of stock and similar values had been treated in litigation of this kind as physical properties and not as values.

Prices at Wallace's Drug Store—Good Sealer rings pints or quarts, 5c dozen; 1lb. boxes Talcum Powder, 25c; Pink pills 50c box or 3 for a dollar; Fruitatives 50c size for 40c; Bland's improved iron tonic pill, 2 oz in a box for 25c, (run about 150 to the box); good washing machine oil 10c quart; Water White coal oil 15c a gallon; Genuine Baby's own Soap, 25c box; Diamond, Dyoia or Turkish dyes, 3 for 25c; Chase's pills, 50c; Castle soap large bars 25c (shell brand); Water glass egg preserver, 15c. Miss Dora Casey is spending the holidays with her brother in Boston Mass.

DEATHS.

BELCHER—At Napanee, on Sunday, July 3rd, 1910, Robert John Belcher, aged 17 years, 10 months.

LANE—At her home in Denbigh, on Sunday, June 28th, 1910, Janet Amanda Wees, beloved wife of William Lane, Esq., J. P. of Denbigh, in her 68th year.

OLIVER—At Richmond, on Saturday July 2nd, 1910, Andrew Oliver, aged 88 years, 2 months, 5 days.

The Bay of Quinte Employees will run their annual excursion on Wednesday, July 27th, per B. of Q. Ry. to Kingston and Str. Brockville to 1000 Islands.

A. S. Kimmerly has full stock of choice alfalfa, red clover, timothy seed, and Manchuria barley. I pay 19c for eggs. 19 lbs granulated sugar \$1. Five Roses Flour has no equal; good flour \$2.60. 8 lbs sulphur 25c.

The Board of the Western Methodist Church are very pleased to acknowledge the receipt this week, through Mr. T. B. German, Executor, the sum of two hundred dollars left by the late Mrs. R. G. Wright to the Church.

M. S. Madole, Rec. Steward.

Feed ground for 6 cents per hundred at the big mill.

J. R. Dafoe wishes to notify his customers and the public generally that the price for grinding feed at the big mill for the present and until further notice will be six cents per hundred pounds with one pound per hundred off for waste. The mill is equipped with two of the best grinding machines known to the trade with a capacity of twenty-five tons per day, feed ground as fine as desired and ready when you call for it.

Your patronage solicited, J. R. DAFOE.
